

PROJECT ENGINEER, VANCOUVER, BC

Creative Energy Overview

Recognized as a leader in innovative energy solutions, Creative Energy designs, builds, owns and operates sustainable district energy systems across North America. In addition to owning and operating one of Canada's largest thermal networks in downtown Vancouver, we provide value to developers, landowners, end-users and the broader community through flexible thermal and electrical neighbourhood energy systems. Our projects focus on innovation, resiliency, and sustainability, and span across a broad spectrum of technologies.

Role Overview

Creative Energy is looking for a Project Engineer to support the development of a large new low-carbon district energy system in Vancouver. You will be directly involved in the development and delivery of the project. You will work closely with stakeholders, developers, world-class consultants and contractors to deliver unique carbon-neutral infrastructure, providing heating and cooling to buildings for decades to come.

This opportunity presents a wide variety of challenges, and will require a Project Engineer who can synthesize project goals, regulatory parameters, policy shifts, a complex risk landscape, project economics and be able to communicate readily with all the parties who touch the project in order to build a collaborative work environment and drive towards success.

Key Responsibilities

Reporting to the Senior Project Manager, duties will include scheduling coordination, risk management, oversight and support of engineering, procurement and construction contracts, coordination with design teams, oversight of construction and commissioning activities, coordination with internal staff, external resources and key stakeholders.

Qualifications

- Degree in Mechanical Engineering or similar
- 3+ years experience delivering infrastructure projects in excess of \$10MM.
- Exceptional collaborative interpersonal skills
- Excellent written and oral communication skills
- Solid time management, organizational and planning skills
- Expertise with project stakeholders to ensure seamless delivery of critical outcomes
- Certification in project management methodologies such as PMP an asset
- Utility and/or healthcare construction experience an asset
