EXHIBIT B

Amendment of 5.10

(The following Rule amendments are underlined and deletions are stricken out)

RULES 1.1 – 5.9 [UNCHANGED]

RULE 5.10 ACCEPTABLE ORDERS

(a) A Member who is not a Market Maker may enter only limit orders to trade Contracts on the Market. For the purpose of this Rule, a “limit order” is an order to buy or sell the number of Contracts specified at the price specified, or a better price if a better price is available.

(b) Duly appointed Market Makers who are making markets pursuant to such appointment shall submit market maker quotations as Post-Only orders. “Post-Only orders” are orders that provide liquidity to a market in that they can be matched opposite any limit order submitted by a Member, but cannot be matched opposite another Post-Only Order submitted by another Market Maker. A Post-Only order, like a limit order, is an order to buy or sell the number of Contracts specified at the price specified, or a better price if a better price is available. However, unlike a limit order, Post-Only Orders will not be matched opposite another Post-Only order. Post-Only orders can be submitted in one of two forms: Post-Only (reject) and Post-Only (price adjustment).

(i) A “Post-Only (reject) order” is an order that will be cancelled by the Exchange in whole or in part to the extent that, at the time it is submitted to the Exchange, it would be immediately executable opposite another Post-Only order. If, however, some portion of such submitted Post-Only (reject) order would be immediately executable opposite any resting limit order(s), that part of such submitted Post-Only (reject) order will be matched opposite such resting limit order(s) by the Exchange. The remaining portion of the submitted Post-Only (reject) order will be cancelled by the Exchange, leaving the opposite Post-Only order in the order book.

(ii) A Post-Only (price adjustment) order is an order that will be cancelled by the Exchange in whole or in part to the extent that, at the time it is submitted to the Exchange, it would be immediately executable opposite another Post-Only order. If, however, some portion of such submitted Post-Only (price adjustment) order would be immediately executable opposite any resting limit order(s), that part of such submitted Post-Only (price adjustment) order will be matched opposite such resting limit order(s) by the Exchange. The remaining portion of the submitted Post-Only (price adjustment) order will be cancelled by the Exchange, leaving the opposite Post-Only order in the order book. Unlike a Post-Only (reject) order, however, upon cancellation of the submitted Post-Only (price adjustment) order, the Exchange will automatically submit an amended quotation for the unfilled balance of the cancelled Post-Only (price adjustment) order at a price level that

is adjusted (a) for Binary Contracts to four minimum tick increments, and (b) for Variable Payout Contracts to one minimum tick increment lower (for bids) or higher (for offers) than the price level of the existing opposite Post-Only order.
