Additional Details:

Description of the Planned Network Change(s):

The DMS10 switch, located at 300 SOUTH EASTLAND IREDELL TX, 76649 will be decommissioned, powered down, and removed from Windstream’s network as a result of network modernization and consolidation. All traffic will need to be routed to the IRDLTXXAPS0 Meta Switch, located at 300 SOUTH EASTLAND IREDELL TX, 76649. Windstream IRDLTXXADS0 A-Block of 254-364 is being moved to IRDLTXXAPS0, A-Block of 254-364.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the IRDLTXXAPS0 Meta Switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the IRDLTXXADS0 DMS10 switch will be required to reposition the codes to the IRDLTXXAPS0 Meta Switch.

All ASRs for the IRDLTXXAPS0 Meta Switch must be received no later than January 7, 2024, in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the IRDLTXXADS0 DMS10 switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the TRNTXXADS0 DCO switch (on or after January 8, 2024). This will serve to guide interconnect re-routes of Windstream traffic for native codes currently served by the IRDLTXXADS0 DMS10 switch to reflect the IRDLTXXAPS0 Meta Switch as the new home switch. All ASRs for the IRDLTXXAPS0 Meta Switch must carry the project code of IRDLTXXAPS0.
