

Gifted Child Find

Intellectual giftedness is found throughout diverse populations and crosses all economic and cultural boundaries. Early identification and intervention are often required to meet the unique needs of these children.

Do you know a student who---

- Is unusually eager to learn
- Is a creative thinker
- Can easily transfer knowledge to new situations
- Show unusual empathy for people and concern for social issues

Research shows that 3-5% of our population possesses many of these exceptional traits. These children should be nurtured and their education enhanced for their benefit and for the advancement of mankind.

If you know of a child who may fit the above criteria, please notify the McNairy County Schools - Special Education Department by telephone at 731-645-6010 or in writing at 535 E. Poplar Ave., Selmer, TN 38375.
