

## APPLICATION FOR FSTD USER APPROVAL AIRPLANE/HELICOPTER

The following information shall be provided by an instructor (SFI/TRI) / or examiner (SFE/TRE) acceptable to ICETRA. In case of AOC holders, NP Training or his deputy must sign the application. A FSTD specification and evaluation report shall be provided.

- Approved Training Organisations (ATO) should send their application to FCL Section of the ICETRA
- AOC holders should send their application to OPS Section of the ICETRA

### A. General

|            |         |                        |         |

Notes:

## D. Classification differences

FOS-002  
Date: 04.01.2019  
Version: 4.2

Classify the difference between the FFS and the tail number (A/C), which the training or proficiency check is based on.

The difference shall be classified between the aircraft and FFS in accordance with the Air Transport Association (ATA) chapters as above:

| Compliance Levels |                                                                                                                                                                                                                                     |                                                                                                                                                                                   |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Level             | Impact                                                                                                                                                                                                                              | Training Methods                                                                                                                                                                  |
| A                 | No Influence on flight characteristics<br>No Influence on procedures (normal and/or abnormal)<br>Differences in presentation<br>Differences in operation.                                                                           | Self instruction via the operations manual or flight crew information.                                                                                                            |
| B                 | No influence on flight characteristics<br>Influence on procedures (normal and/or abnormal)<br>Possible differences in presentation and operation.                                                                                   | Flight crew information, computer-based training, system device training or special instruction by instructor.                                                                    |
| C                 | Influence on flight characteristics<br>Influence on procedures (normal and/or abnormal) and<br>Eventually differences in presentation and operation.                                                                                | Special instruction by instructor, a selected partial training on another FSTD or aircraft or a waiver because of previous experience, special instruction or training programme. |
| D                 | Influence on flight characteristics and/or<br>Influence on procedures (normal/abnormal) and/or<br>Differences in presentation and/or operation and<br>FFS is level D qualified and is used for zero flight time<br>Training (ZFTT). | A specified partial training on another FSTD or aircraft or a waiver because of previous experience, special instruction or training programme.                                   |

1. State „Yes“ or „No“ according to impact on flight characteristic, with resulting or required procedure changes.
2. State the compliance level A,B, C, D dependent on the statement made under Flight characteristics, according to the definitions above.
3. Describe the difference between the FSTD and the actual aircraft (e.g. difference in MCTOM) State also the consequences on the operation, e.g. if there is a difference in databases, RNAV capability, RVR certification etc.
4. Insert continual numbers for detailed descriptions, under Notes above. If there is no difference between FSTD and the aircraft used, state "Principles of operation and control of the system is similar to all (aircraft –model) used by the company"

### Applicant's Statement:

**I herewith confirm correctness of the application and confirm that I find this FSTD suitable for training and checking according to items listed in the application. I confirm as user our conformity with ORO.FC.145(e)**
