Setup your Modem

- 1.1. Connect the Coax Cable:** Attach one end of the **Coax Cable** to a cable outlet and the other end to your modem. Ensure connections are hand-tightened.
- 1.2. Power Up the Modem:** Connect the **Modem Power Cord** to the modem and a power outlet.
- 1.3.** Now that your Internet is set up, turn this page over to set up your Whole-Home WiFi.

Next, Let's set up your Whole-Home WiFi

Access the eero App

The eero app is essential for setting up and managing your Internet. It provides easy step-by-step instructions to configure your network, check connected devices, and troubleshoot common issues associated with your network.

Download the eero App

2.1. On your mobile device, visit the App Store or Google Play, search for "eero," then download the app. You can also scan below to access the app store on your device.

2.2. Log-in with your Amazon account, eero account, or create a new login.

Note: Logging in with your Amazon account centralizes control of your connected home and gives you features like Amazon Frustration-Free Setup, Alexa Smart Home Hub, multi-factor authentication, and security alerts.

Set Up Your Whole-Home WiFi Network and Preferences

The eero app will guide you through easy set-up instructions to activate your Whole-Home WiFi. To get started, follow these steps:

3.1. Simply follow the steps in the eero app to complete your setup.

3.2. Once setup is complete, be sure to update the WiFi network login settings for any devices you previously had connected to WiFi.

Helpful tips

- Ensure your outlet isn't controlled by an on/off switch.
- If you're transitioning from an old WiFi network, write down your existing network name and password. Once you've activated your new WiFi modem, you can update your settings to ensure your previously connected devices automatically connect to the new WiFi network.
- If the lights on your modem are not solid after 10 minutes, please contact us using one of the options below.
