

IMPORTANT INFORMATION ABOUT THE AVAILABILITY OF ACCESSIBLE NAVIGATION DEVICES

WOW! makes available in certain of its cable television systems equipment that helps our blind and visually impaired customers access our cable television services. We provide this notice to give you information about this equipment and how you can request it.

- **Availability of the WOW! Accessible Receiver**

In certain markets, our blind or visually impaired customers¹ can contact us to request a navigation device with on-screen text menus and guides for the display or selection of video programming that are audibly accessible in real time.

- **Accessibility and Compatibility Features**

The device offered by WOW! is manufactured by TiVo (the "WOW! Accessible Receiver"), and allows many functions used for the display or selection of video programming (like program selection, playback functions and volume controls) to be audibly accessed through on-screen text menus or guides. For more information about the accessibility features of the WOW! Accessible Receiver, please call us or click on the Accessibility link at the bottom of our home page.

- **How to Request a WOW! Accessible Receiver; Contact Information**
