Trial Units

WalkOn FIT KIT is testing equipment designed to facilitate the correct choice of a WalkOn AFO (ankle foot orthosis). The objective is to assess which WalkOn type is appropriate for the patient condition. The test orthoses are intended to evaluate whether the size is correct and the desired effect is achieved.

Ottobock Australia offers 1 week free patient trials, in addition to 1 week travel time to and from Sydney (2 weeks total). A loaner fee of \$150 per week per kit applies for each week the unit is outstanding after this time.

WalkOn FIT KIT (please select)
