

mHand Adapt. 8K35*

The *mHand Adapt* is the lightest hand on the market and, thanks to its patented mechanism, is intuitive and easy to use. Everyday tasks can be carried out in a controlled manner after a short training session. The fingers automatically adapt to the shape of the object being grasped, ensuring a secure grip at all times.

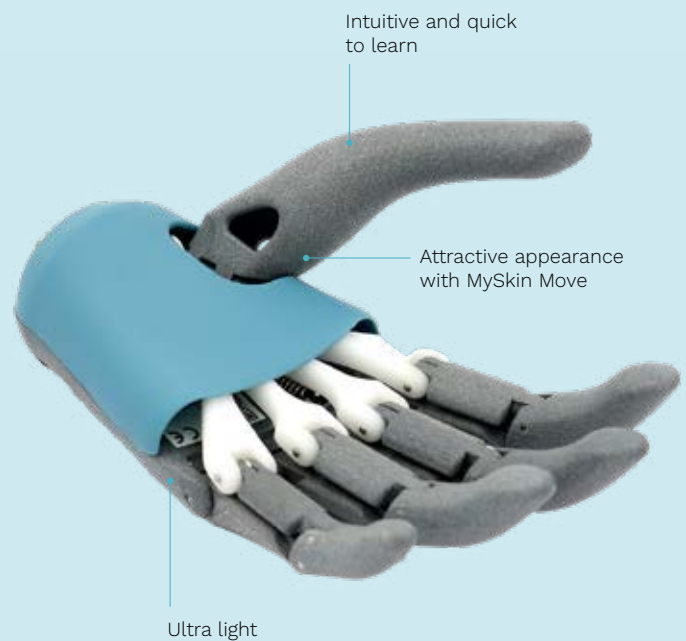

Advantages

- Ultralight – very comfortable to wear throughout the day
- Attractive appearance with the custom fabricated MySkin Move
- Intuitive and quick to learn
- Same movement pattern to open and close the hand
- Thumb can be placed laterally or in opposition by rotating
- Grip width can be varied in 7 levels at the push of a button
- Gripping force is easy to control
- The fingers adapt to objects for the optimal grip
- Carrying weight up to 10 kg

mHand Adapt must be used with:

- mHand Skin 8S18=*
- mySkin Move 88A16=*

mHand Skin. 8S18*

The functional *mHand Skin* prosthetic glove made of PVC features a natural appearance and flexibility. Thanks to the additional outer coating, the *mHand Skin* is less susceptible to dirt and easier to clean than conventional PVC gloves.

Appearance

- The skin texture and shape of the *mHand Skin* create a natural appearance and secure grip.

Durable and easy to clean

- The additional outer coating makes the glove less susceptible to dirt and easier to clean than conventional PVC gloves.

Cost-effective

- Offers an excellent price-performance ratio.

Unisex version

- In 7 colours*

* Use the *mHand Skin* (646M95) colour swatches to determine the colour. Sleeve length must be adjusted

MySkin Move. 88A16=*

The custom silicone cover for the *mHand Adapt*, which is fabricated by hand, combines aesthetics with functionality.

The *MySkin Move* imitates the user's anatomy and skin colour down to the last detail. Thanks to the different Shore hardnesses of the silicone, it is flexible in the moveable regions of the hand and stable at the transition to the socket. This

guarantees a perfect fit and provides optimal protection for the prosthesis against dirt and moisture.

Colour

Custom colouring in up to eight skin tones, depending on the variant.

Shaping

Reconstruction of the shape of the user's hand and fingers, taking into account the *mHand Adapt*.

Advantages

- Natural appearance with lifelike skin textures and impression of depth
- Custom design and colouring of the fingernails
- Long-lasting clean appearance thanks to hygienic, easy-to-clean silicone
