

Avantgarde DV & DS

The Avantgarde DV impresses with its light weight, but this does not mean it has lost any of its proven advantages. The Avantgarde DV's removable and swing-away leg supports let you drive up close to objects. The leg supports can be folded in or out for this purpose. Removing the leg supports also makes self-propulsion possible.

The Avantgarde DS stands out for its extremely small folding size. At the same time, it offers active wheelchair users numerous options. With its compact design and integrated leg supports, the Avantgarde DS has the lowest net weight from 8.7kg in the Avantgarde series.
