## connectgrip.

# Fine-tune your hand for everyday tasks.

The **connectgrip** app and **myosmart** give you precise control of how your myoelectric hand moves, grasps, and responds to your muscle signals. Adjust the grips, change switching events, personalize your settings, and more, all right from your Apple or Android device.

### Feel your hand get better and better

Together, **connectgrip** and **speedhand** give you more control and confidence with every adjustment you make. Each one helps **speedhand** move exactly how you want and need it to, with exactly the right speed, switches,

### Product Highlights:

- Customizable control personalized to you.
- Easily fine tune your myoelectric prosthesis at any time.
- Dial in your prosthesis' performance at home.
- Also available in Dark Mode.
