EasyFlash®

A simple and effective retrofit solution to ensure a home space that is comfortable and protects what you care about, no matter what the weather outside.

* Based on analysis with 50 merchants and truss manufacturers

EasyFlash® is an innovative, dry-fix waterproofing solution specifically designed to replace traditional metal flashing for abutments and junctions between walls and roof tiles. Manufactured with a butyl self-adhesive backing and a crêped, aluminium surface. The highly flexible (up to 50% stretch) structure enables neat, fast, effortless fitment. EasyFlash® is extremely durable, lasting for up to 15 years in all weather conditions, maintenance-free with Connection Strip applied.

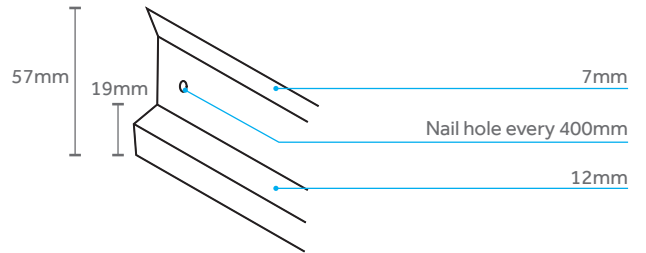

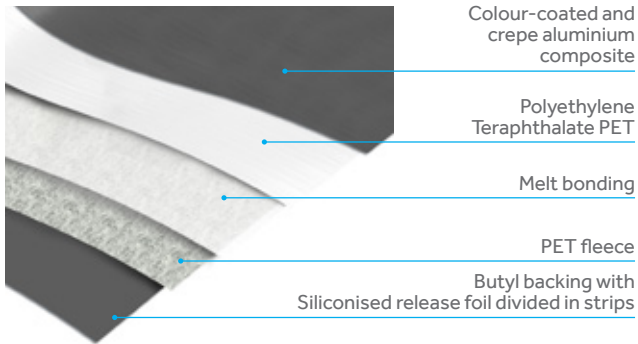

The Connection Strip is screwed onto the EasyFlash® and the wall to provide additional sealing against water ingress due to paint peeling. The top end is then sealed with a suitable weather resistant silicon sealant.

APPLICATIONS ON TILED ROOFS

- Side and horizontal wall connections
- Dormers
- Chimneys**

**Not suitable for metal chimney applications due to rising temperatures of above 80°C and no surface area to apply Connection Strip.

COMPONENTS

EASYFLASH®

Material Aluminium composite (Aluminium Foil, Polyethylene Teraphthalate PET, Melt bonding & PET fleece), Butyl backing & siliconised release foil.

Roll dimensions (m) 5 (L) x 0.25 (W)

Stretch factor up to 50%

Surface Colours Brown / Black / Terracotta

Recommended to seal with Connection Strip in accordance with application instructions

CONNECTION STRIP

Material Clean colourbond steel

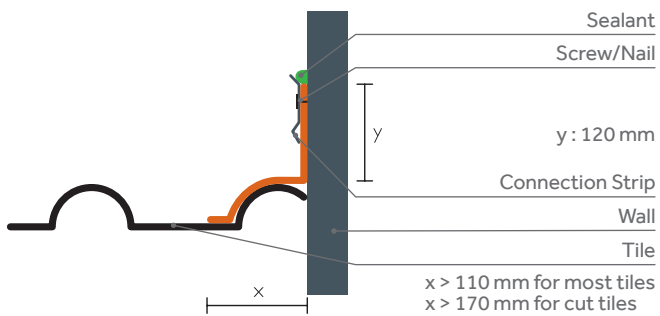

Dimensions (m) 2.4 (L) x 0.6 (W)

Colour Double-sided brown & terracotta

APPLICATION

Preparation

Ensure that the tile surface is dry, free from dirt and dust. Plastered walls must first be primed and painted.
