Grid® Report for Construction Project Management | Winter 2026

Grid® Report for Construction Project Management | Winter 2026 is based off of scores calculated using the G2 Grid® algorithms from reviews collected by November 04, 2025.

"I love being able to manage a project from bidding to closeout. There is a tool or integration for every aspect of the project lifecycle, with new items being developed continuously. I also love that Procore can be accessed from anywhere, any time. We have team members that work remotely all over the country, but we can connect on Procore items no matter where we are."

98% of users rated it 4 or 5 stars

Quality of Support

92% 88% G2 Average

"I love the fact that Procore is truly an all in one tool that captures all areas of construction management. From RFI's to Submittals, to schedules, punch list, etc., it is all there in some capacity."

G2 Reviewer

"Procore's customer support team members have always been engaging, competent, professional, and kind. I appreciate their approach to any question or user problem. It reinforces how I want our business to interact with our customers. I have worked with six (6) software project management software systems. Procore wins, mic-drop."

G2 Reviewer

Ease of Use

89% 86% G2 Average

"Procore has an intuitive and easy-to-navigate UI that means even the least tech-savvy person can become self-sufficient with either mobile or desktop app very quickly. Additionally, the technical support is great. You are always speaking to a live person, even through the chat feature, and they work hard to ensure the response time is low and the issue gets fixed."

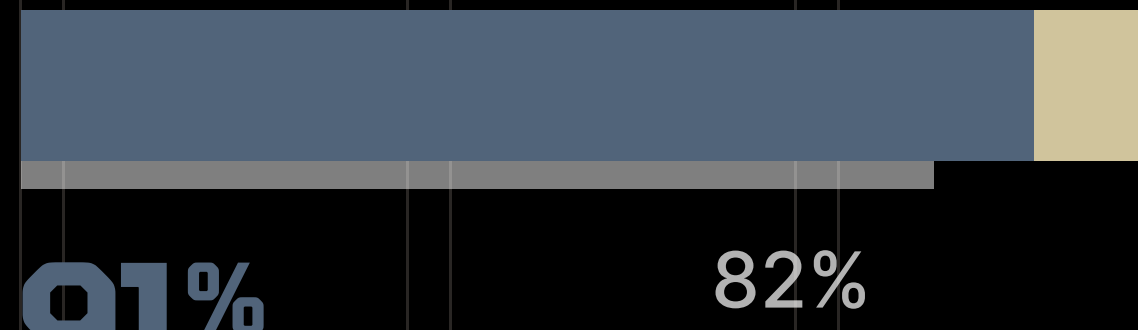

G2 Reviewer

"Procore has been a seamless construction management tool that helped me facilitate all facets of a project from pre-con through the course of construction. It's a breeze to navigate and if you're struggling you can use their built-in Procore courses or reach out to anyone in their customer service department. I fear the day I ever leave my current company and end up somewhere that doesn't utilize Procore."

Communication and Collaboration

90% 85% G2 Average

"The drawing tool alone was huge. How it organizes and keeps drawings up to date saves a lot of time and keeps us from using wrong or old information. There is no question that [with] the drawings tool and the other core tools [that] Procore more than pays for itself every year."

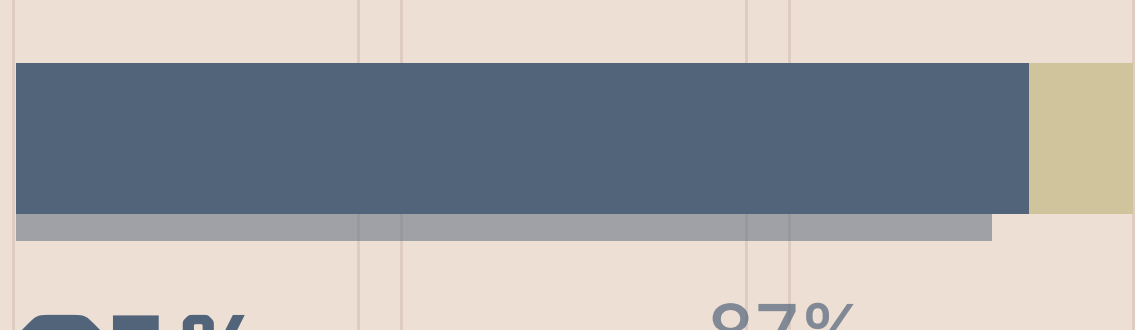

G2 Reviewer

"Procore allows access to the latest drawings, specifications and submittals at any time, which is excellent for collaboration in the field for designers and contractors alike. All project information is very well organized and easily accessible to all users. Procore allows for more efficient communication between all stakeholders in the project, from owners to designers and to contractors. Procore increases productivity, minimizes errors, and saves both time and money."

G2 Reviewer

Information Management

91% 87% G2 Average

"Procore is by far the best management software I have ever used. It is highly intuitive. The ease of use from the field level to the office makes capturing valuable data seamless. Information captured in the field can be reviewed immediately by everyone who has access to the project and makes faster and more accurate decisions. Using Procore has allowed us to have real-time project financials that include labor. We self-perform much of our work, and seeing where a project is financially at any given time is extremely important."
