

SMART HOME MONITORING

Door/Window Sensor

Manufacturer's Installation Guide

Installation

NOTE: Please make sure that the sensor and magnet is located less than 1.27 cm(0.5 inch) from each other. For optimal results, it is highly recommended to attach the door / window sensor to the fixed frame and the magnet to the moving part of the door / window.

1. Hold the sensor near the top of the door, close to the opening edge of the door. This is the mounting location for the sensor.

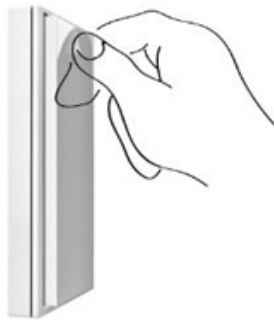

FIGURE 2

2. Use provided adhesive on the sensor. Attach the sensor to the door. Press firmly and hold in place for a few seconds (Figure 2). Secure with silicone.

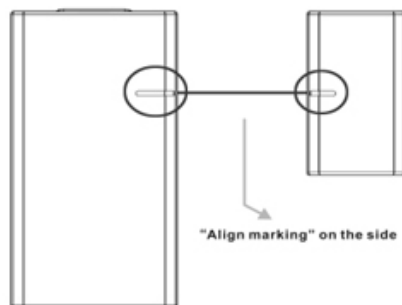

FIGURE 3

3. Use provided adhesive on the magnet. Make sure the alignment marks of both sensor and magnet are facing each other (Figure 3). Attach the sensor. Press firmly and hold in place for a few seconds. Secure with silicone.
