

FORTHRIGHT

Announcement for Website regarding Enhancements (8.9.2024)

Forthright continues to add enhancements to its Case Management Portal that will provide convenience and additional efficiencies to the New Jersey PIP practitioner community.

Links to Cases on Consolidated Matters

Previously, any practitioner viewing their case on the Forthright Case Management Portal could see active links of the case numbers of all matters that are consolidated with their case; clicking on the link revealed additional data, including scheduling history and the contact information for all other representatives involved in the consolidated matter.

Practitioners can now click on the links of cases where they are already a party representative and go directly to the entire case information page of the consolidated matter. Practitioners can identify the attorneys or representatives who have cases consolidated with their matter, as well as navigate to their own consolidated matters.

Uploading Documents to Multiple Consolidated Cases

For practitioners who are representatives in multiple party consolidations, they will now have the option of uploading submissions one time and directing them to any or all their consolidated cases, saving time and reducing the risk of missing a case.

OTP Due Date Displaying on Case Information

In the same way the pending hearing date is posted on the case information page for In-Person (IP) cases, the page will now show the pending due date of Initial and Final Submissions for on On-The-Paper (OTP) cases directly underneath the status of the case..

Exportable List from DRP Decisions

When searching awards of Dispute Resolution Professionals, the results can now also be exported in an excel spread sheet for ease of review and analysis.
