PRICING

Priced on what you use

AI has made almost any single security tool practical to rebuild, so what is worth paying for now is convenience and integration: not running the infrastructure yourself, and every capability working together. LimaCharlie builds each capability on one system, which is why it costs a fraction of what single-product vendors charge. Every rate is published, and you pay only for what you use.

List prices

CAPABILITY	PRICE	UNIT	NOTES
Endpoint detection and response	$3.00	per endpoint per month	Sensors for Windows, macOS, Linux, and the Chrome browser. Volume pricing from 5,000 endpoints.
Telemetry from other sources	$0.20	per GB	Telemetry from cloud, identity, SaaS, and other security tools.
Storage	Included	one year	Searchable storage on every plan.
Cloud Security	$150	per organization per month	CNAPP for your cloud accounts.
Code Security	$0.80	per protected repository per month	Part of Cloud Security, so it adds to the Cloud Security fee. Billed daily on that day's count of protected repositories.
Email Security	$1	per protected inbox	Attachment analysis and the built-in rule pack included.
Data forwarding	Included	GCS, Pub/Sub, or BigQuery in your region	Free when the Google Cloud destination is in the same region as your LimaCharlie datacenter. Other destinations, such as S3 or Splunk, at $0.12 per GB.
Custom branding	$0.20	per sensor per month	Plus a one-time setup fee of $1,000.
App Control	$0.40	per sensor per month	Also available on the free Community Edition.

Plans

$0

Free Community Edition

Up to 2 endpoints; Cloud Security for 10 users and 250 resources; Code Security for 10 repositories; Email Security for 10 mailboxes. Telemetry sources free, one year of storage, community support. No credit card required.

LIST PRICES

Standard

Unlimited endpoints at the list prices above, plus AI agents, data forwarding, Python playbooks, and custom branding. Ticket and community forum support.

CUSTOM TIERS

Builder Program, for service providers

Custom tiered pricing with discounted rates, and a technical account manager with Slack support. Contact our sales team for details.

> If you're looking at our cost per endpoint... I think it's more than cut it in half.
>
> John Strand, Owner, Black Hills Information Security

Terms

No contract and no cancellation fee: you are billed month to month for what you use. Pay by credit card or ACH. Service providers running many customers get a single, unified bill. Volume discounts and private cloud options are available.
