8. SECURITY

8.1 Security measures

We store and access personal data in various locations and cloud services. Servers that store information for us are primarily located in Sweden and Europe, although storage may occur in other locations as well. We use reasonable administrative, technical and organizational measures (a) to safeguard personal data against loss, theft, unauthorized use, disclosure, or modification, and (b) to ensure the integrity of your personal data. To help us protect your privacy, you should keep any user names and passwords, membership numbers, or other identifiers or credentials you may have set up or were provided in connection with your participation in or use of our products, services, or websites safe.

8.2 Transmissions

As you may be aware, there is no completely secure method of transmitting or storing data. There are risks related to all kinds of transmission (such as loss, fault, monitoring and misuse of transferred data) due to the different ways in which data can be sent (e.g. postal mail, text messages, faxes, and transfers via the Internet or wireless networks). If you have reason to believe that any account with us is no longer secure, you must immediately contact us.

We try to strike a balance between the security of your data and your convenience. As a result, we may sometimes use a method of communication that is less secure than a less convenient alternative. For example, we may send you an e-mail or a text message in unencrypted form (i.e. instantly readable) because many of our customers are unable to access encrypted (i.e. coded) e-mails or messages. This means that our message, if misrouted or intercepted, could be read more easily than an encrypted message. Such messages may contain personal data. Please do not include confidential information, such as your credit card number or account password, in any e-mail or text you send to us or on any posting you make to a public area of a third-party social network, especially since any such posting

immediately becomes public. For a more secure way to communicate with us over the Internet, please see our contact information in our app.

8.3 Access

We restrict access to personal data to our employees and providers who need to use it in order to process it on our behalf, and who are contractually by law required to keep your personal data secure and confidential. We aim to choose the option for data processing that best safeguards the integrity of your personal data toward any third party.

9. THIRD PARTY SERVICES AND APPS

When using our vehicles, you may access applications and other services linked with our vehicles but provided by a third party, which may, for example, require transmission of location data and other vehicle-recorded data to this third party. Neither we nor any of our group companies are responsible for the collection or use of personal data in applications or services provided by a third party, and recommends that you carefully review applicable terms for (and any privacy policy related to) such applications or services before you use them. If you have questions concerning a certain third party's use of your personal data, please contact the third party directly. We also recommend familiarizing yourself for privacy options and controls in third party applications after downloading.

10. COOKIES

In general, you can visit our websites without telling us who you are or revealing any information about yourself. However, to be able to provide you with certain services or offerings, we often need to record certain items of personal data, such as your name and e-mail address. We may also collect (by means of cookies) anonymous information on how you have used our websites prior to such recording. This information will be helpful to us in order to improve our websites or marketing. All our websites open to our customers include information concerning our use of cookies. For certain countries there is also an online procedure for accepting or declining cookies. For more information regarding our use of cookies, please see our cookie policy published at www.m.co.

Our webpages are not directed to individuals below 13 years of age, and we do not intentionally collect personal data from such individuals.

11. AUTOMATED DECISION-MAKING INCLUDING PROFILING

Sometimes we use automated decision-making. It can e.g. be an automated rejection of a reservation. Usage of automated decision-making could for instance mean that you do not have the possibility to reserve certain vehicles based on your age or any vehicle based on your credit rating which you have provided or we have obtained electronically without personal interaction. This information is relevant since we have made a risk assessment implying that it is not commercially desirable to rent out certain categories of vehicles to people under a certain age or with a low credit rating.

You have the right not to be subject to a decision based solely on any form of automated decision-making, including profiling, if the decision may have legal consequences for you or in a significant way affects you in any other way. However, we have the right to use automated decision-making if it is necessary for entering into or performance of an agreement between you and us or if you have given consent to the processing. You have the right to personal contact with us which means that you can contact us via the contact information provided in section 13 to express your opinion and oppose the decision.

Do not hesitate to contact us if you have any questions regarding your rights.

Please note that we will always make an assessment of a request to exercise a right to determine whether the request is valid. All rights listed below are not absolute and exceptions may apply.
