Cilacap Tengah, Cilacap, Jawa Tengah 53224

A Frontend Engineer with 2+ years experience in developing responsive and interactive user interfaces. Skilled in web technologies such as HTML, CSS, and JavaScript, with experience in modern frameworks like and Vue and Nuxt. Additionally, I am a fast learner and highly motivated, always striving to enhance my skills and find efficient and effective solutions to complex technical challenges.

## EDUCATION

**Politeknik Negeri Cilacap**                                                                                     **Cilacap**
*Diploma III*  in  *Informatics Engineering*  | GPA:  3.73 / 4.00                                                2019 - 2022

- Selected as a Campus Ambassador, actively promoting the polytechnic to prospective students, the community, and industry partners.
- Led the informatics engineering student association in coordinating academic and non-academic activities
- Achieved third place out of 20 teams in Debate Competition at National Polytechnic English Olympics, enhancing the polytechnic's reputation nationally

## WORK EXPERIENCE

**Komerce - PT Kampung Marketerindo Berdaya**                                          **Purbalingga, Indonesia**
*Frontend Engineer*, *Permanent Employee*                                                          November 2022 - Present

- Collaborate closely with Product Managers, UI/UX Designers, and Backend Engineers throughout the development lifecycle.
- Translate user stories, product requirements, and design mockups into clean, responsive, and performant web applications.
- Develop reusable and maintainable front-end components using Vue resulting in a 40% increase in development efficiency.
- Optimize front-end applications for performance and responsiveness across different devices and browsers.
- Work closely with the QA team to identify and fix bugs.

**PT Langitpay Digital Indonesia**                                                             **Jakarta, Indonesia**
*Frontend Engineer*, *Contract Employee*                                                     August 2022 - October 2022

- Developed business intelligence (BI) dashboards to transform complex data into actionable insights for key stakeholders.
- Collaborate with data analysts and product managers to understand business requirements and translate them into user-friendly visualizations
- Implement data visualization best practices to ensure clear and effective communication of insights
- Integrate with back-end APIs to fetch and manipulate data for display
- Achieve a 30% improvement in BI dashboard loading times through optimized data fetching and frontend caching strategies

**Politeknik Negeri Cilacap**                                                                   **Cilacap, Indonesia**
*Fullstack Developer*, *Internship*                                                          July 2021 - December 2021

- Collaborate with stakeholders to understand the requirements and specifications for the employee performance target information system.
- Design and develop a user-friendly and secure web application using Laravel framework.
- Implement functionalities for managing employee profiles, setting performance targets, tracking progress, and generating reports. Increase performance tracking accuracy by 70%
- Deploy the system to a production environment and perform ongoing maintenance and updates.
- Provide technical support to users and troubleshoot any issues that may arise.
