

Diagnostics Schedule

This document outlines the diagnostic investigations that do not require a co-payment. This means we will pay 100% of the eligible costs, less any applicable excess, up to your overall benefit limit, as outlined in your policy document.

We've grouped these into categories to make it easier for you to read, but the category headings aren't intended to limit the list of investigations. We may update this document from time to time.

Diagnostics that may be performed by a variety of specialists
