

ZIBER SERIES

LED STREET LIGHT 20W-200W

Features

1. CREE/LUMILEDS/OSRAM original high-power LED is selected, which fully ensures the light color stability and light pass maintenance rate of the lamp.
2. The international famous brand special driving power supply for high-power LED street lamps has been adopted, and the reliability and stability of lamps have been greatly improved through various certifications.
3. The secondary light distribution design with independent intellectual property rights can improve the efficiency of lamps and make the distance-height ratio of lamps reach 1: 4; Optical lenses with high light transmittance make lamps more efficient.
4. Unique design, High efficiency LED components, increase the safety of use; High-strength tempered glass mask makes lamps easier to clean and optical devices more durable.
5. Support side entry and top post install, fixture angle adjustable, for side entry, ±10°, top post, 0~20°.

Application

Urban Secondary Road, Branch Road, Rural Road, Park Landscape Road, Commercial Residential Road.
