

# VITRO SERIES

LED STREET LIGHT  
20W-150W

## Features

1. CREE/LUMILEDS/OSRAM original high-power LED is selected, which fully ensures the light color stability and light pass maintenance rate of the lamp.
2. The international famous brand special driving power supply for high-power LED street lamps has been adopted, and the reliability and stability of lamps have been greatly improved through various certifications.
3. The secondary light distribution design with independent intellectual property rights can improve the efficiency of lamps and make the distance-height ratio of lamps reach 1:4; Optical lenses with high light transmittance make lamps more efficient.
4. Innovative rib-type heat dissipation design makes full use of the surface area of the lamp body and has better heat dissipation effect.
5. Unique design, lighter lamps, increase the safety of use.

## Application

Urban Secondary Road, Branch Road, Rural Road, Park Landscape Road, Commercial Residential Road.
