

Master the

Subtraction Facts from 5

4-group Math[™] is a visual and kinesthetic method designed to develop number sense and fact fluency. It uses a unique set of number patterns to make math easy and fun.

Introduction to 4-group Math

Mission statement: Creating a new generation of kids who love math.

To be successful in mathematics children must have <u>rapid</u> recall and know with <u>accuracy</u> and <u>confidence</u> their addition and subtraction facts.

Subitizing

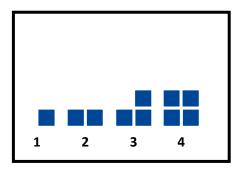

The science behind 4-group Math is called *subitizing* (pronounced *sue-bi-tie-zing*): the brain's <u>rapid</u>, <u>accurate</u> and <u>confident</u> judgment of the quantity of a set of objects without counting.

Young children can *subitize* a set of four objects when those objects are arranged in a square pattern.

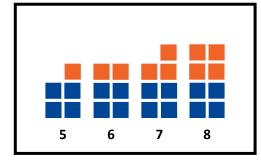

4-group Math, a visual and tactile model, uses this innate ability as an anchor to conceptualize the quantity of numbers.

The 4-group Number Patterns

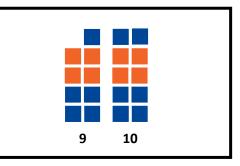

The 4-group Number Patterns 1-4 are easy to see and *subitize*.

1, 2, 3, & 4 are attached to another 4-pattern to create 5, 6, 7 and 8.

The 1- and 2- patterns are attached to the 8-pattern to create 9 and 10.

Addition and Subtraction

The 4-group Number Patterns are unique in that they are summative. They fit together like a puzzle to form the 4-group Number Pattern for their sum. For example; a 3-pattern and a 2-pattern combine to make the 5-pattern while the 4-pattern and 1-pattern combine to make the same 5-pattern. (FIGURE 1)

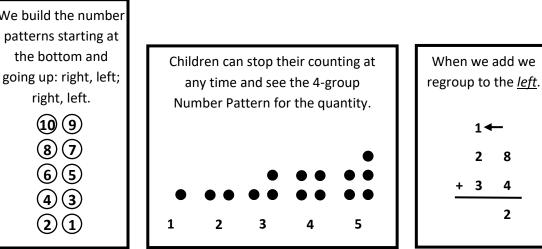

FIGURE 2

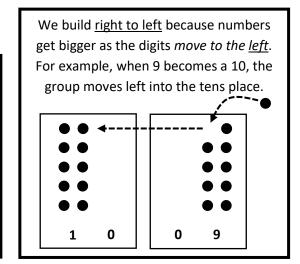

addition

4-group Math Counting Order

subtraction

4-group Math uses a unique counting order that starts at the bottom and counts up from right to left. We have found that children who count in this manner, make fewer mistakes in their counting.

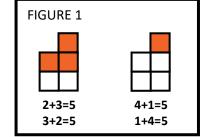

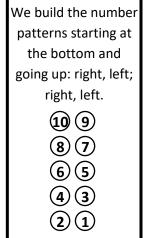

5-3=2

5-2=3

The 4-group Number Patterns are unique in that subtraction

is modeled as the exact opposite of addition. (FIGURE 2)

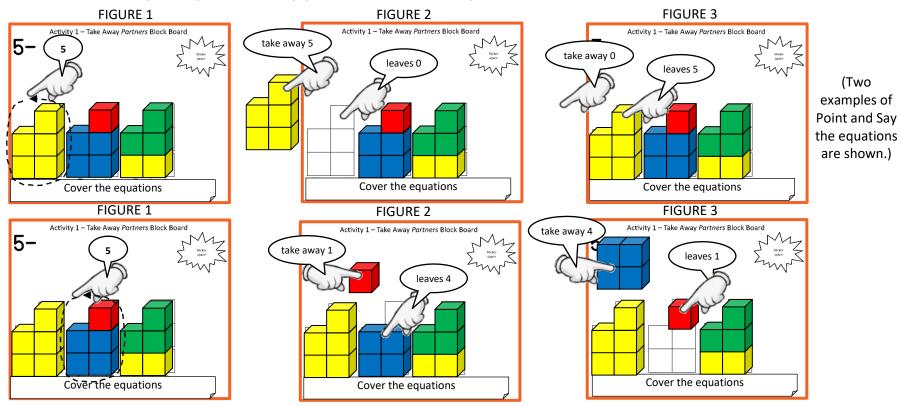

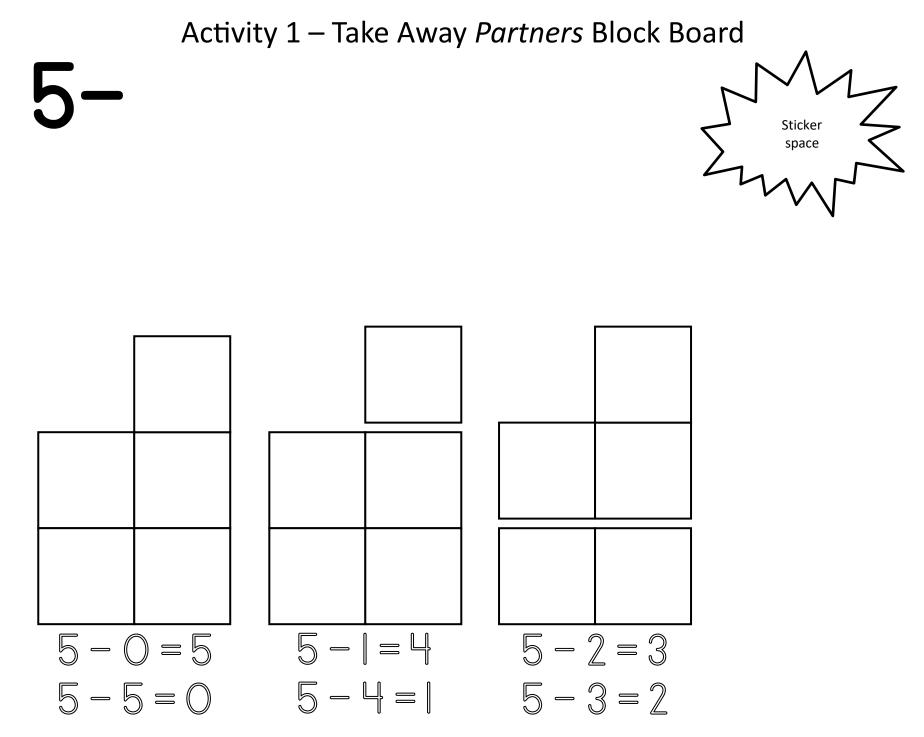

Activity 1 – Take Away Partners Directions

- **OBJECTIVE:** Build, take away, and recite the subtraction equations from 5: 5-0=5, 5-5=0; 5-1=4, 5-4=1; 5-2=3, 5-3=2
- MATERIALS: 4-group Number Blocks: one 1-block, one 2-block, one 3-block, one 4-block, and one 5-block Activity 1 – Take Away *Partners* Block Board
- **GROUP:** Independent, 1 on 1, or small group
- DIRECTIONS: Build the block combinations to show the *partners* for five. Use two colors of blocks for each set of *partners*, except 5-0, 5-5. Then, cover up the equations and Point and Say each equation to a friend. Circle the whole 5-pattern with your finger and say, *"Five."* (FIGURE 1) Physically <u>take away</u> a block as you Point and Say each <u>subtraction</u> equation. (FIGURE 2) Remember to switch the *partners*. (FIGURE 3)

Begin with the language, "___ take away ___ leaves __," eventually switch to, "___ minus ___ equals __." When you complete this activity, put a sticker in the Sticker space.

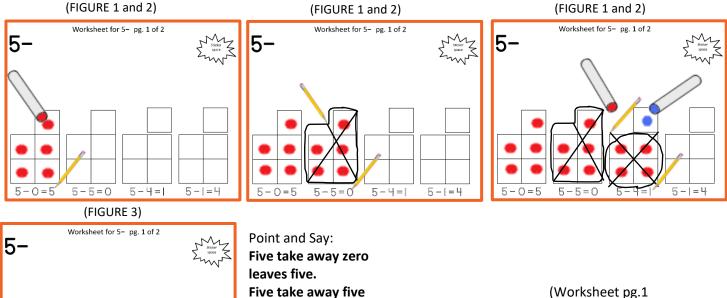

Activity 2 – <u>Coloring</u> Take Away *Partners* Directions

OBJECTIVE: Color, take away, and recite the subtraction equations from 5: 5-0=5, 5-5=0; 5-1=4, 5-4=1; 5-2=3, 5-3=2

- MATERIALS: Two colors of crayons, markers, or stamps Pencil Worksheet for 5- pgs. 1-2
- **GROUP:** Independent, 1 on 1, or small group

DIRECTIONS: Color to show the *partners* of five. Use two colors for each set of *partners*, except 5-0, 5-5. (FIGURE 1) <u>Circle & then cross out</u> the <u>whole</u> number pattern that represents the equation shown below the picture. (FIGURE 2) In pencil, write over each equation <u>after</u> you finish its picture. (FIGURE 2) Then, cover up the equations and Point and Say each subtraction equation to a friend. (FIGURE 3) When you complete this activity, put a sticker in the Sticker space

leaves zero.

leaves one.

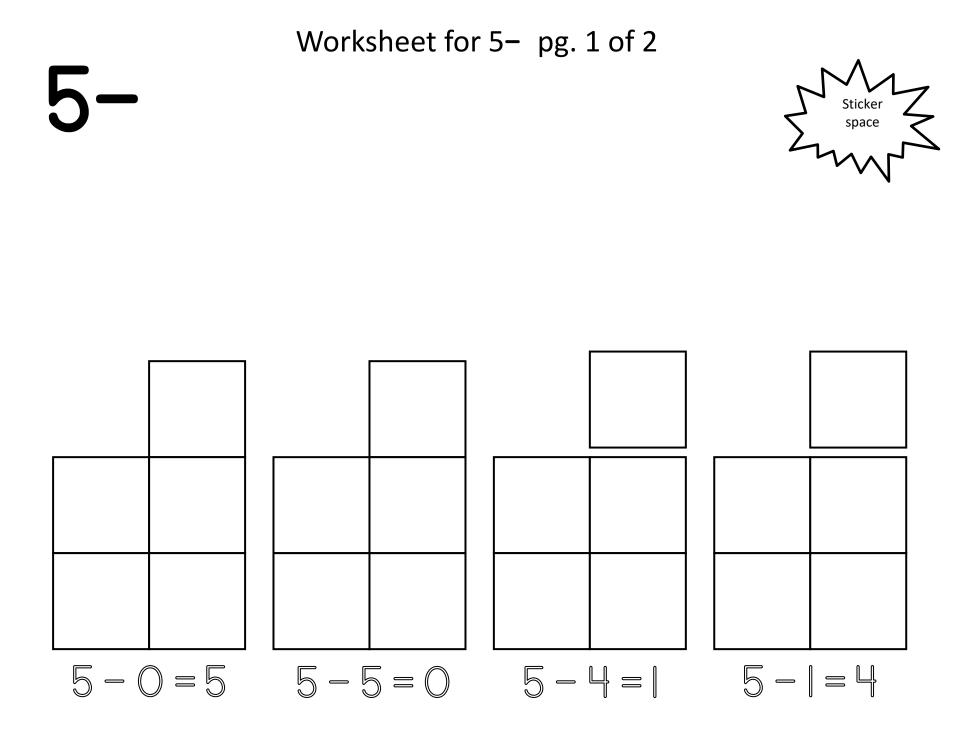

leaves four.

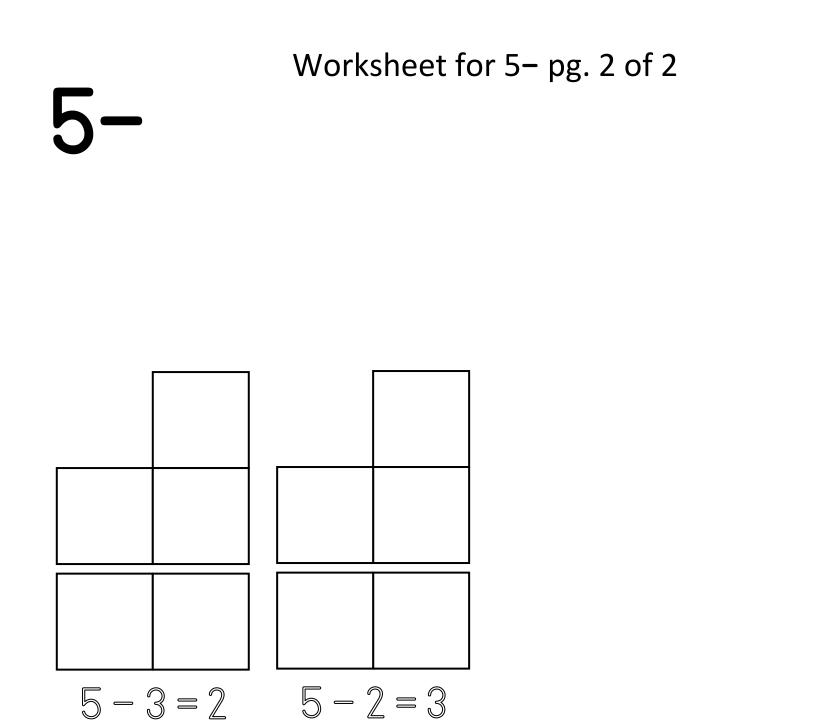

Five take away four

Five take away one

(Worksheet pg.1 is shown.)

Cover the equations

Activity 3 – Playing Card Take Away Partners Directions

OBJECTIVE: Make 5 with two cards, then recite the subtraction equations from 5: 5-0=5, 5-5=0; 5-1=4, 5-4=1; 5-2=3, 5-3=2

MATERIALS: One deck of 4-group Math Playing Cards; use only the cards 0-5. A clear "play" space to lay out the cards.

- **GROUP:** Independent, 1 on 1, or small group
- DIRECTIONS: Spread out the cards face up on your play space. Make <u>all</u> the two card 4-group Number Pattern combinations to form the number pattern for five. Use all the cards. You will have multiple examples of each equation. (FIGURE 1) Circle the 5-pattern with your finger and say, "*Five*". (FIGURE 2) Physically <u>take away</u> a card as you Point and Say each <u>subtraction</u> equation to a friend. (FIGURE 2) Remember to switch the *partners*; taking the other card away. (FIGURE 3) Begin with the language, "<u>take away</u> <u>leaves</u>," eventually switch to, "<u>minus</u> <u>equals</u>." When you complete this activity, put a sticker in the Sticker space.

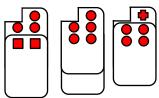

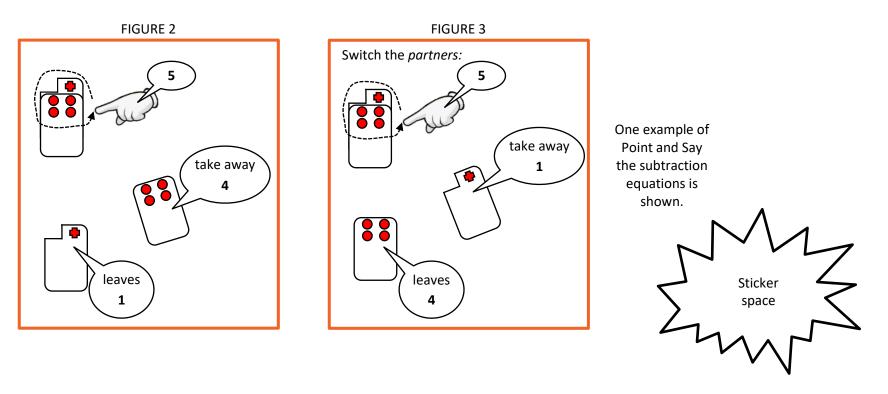

FIGURE 1

Activity 4 – Build & Color Take Away Partners Directions

OBJECTIVE: Build, color, take away, and recite the subtraction equations from 5: 5-0=5, 5-5=0; 5-1=4, 5-4=1; 5-2=3, 5-3=2

MATERIALS: Two colors of a small manipulative; cubes, buttons, candies, crackers

Two crayons or markers to match the manipulatives' colors. Pencil

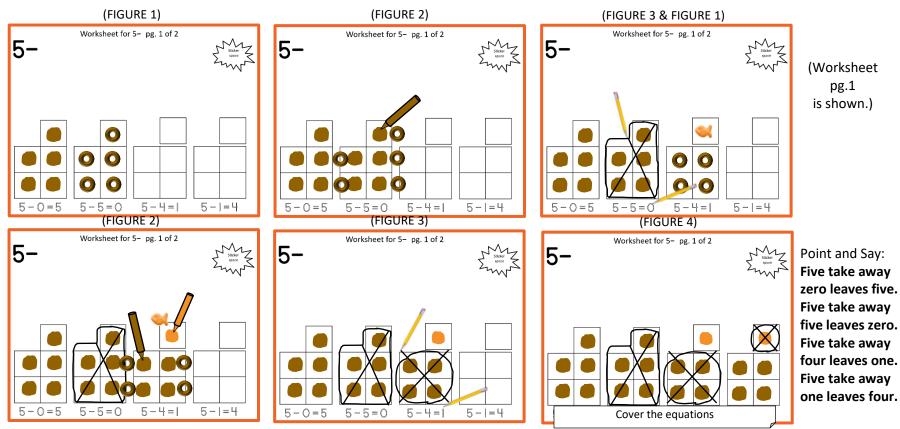

Worksheet for 5- pgs. 1-2

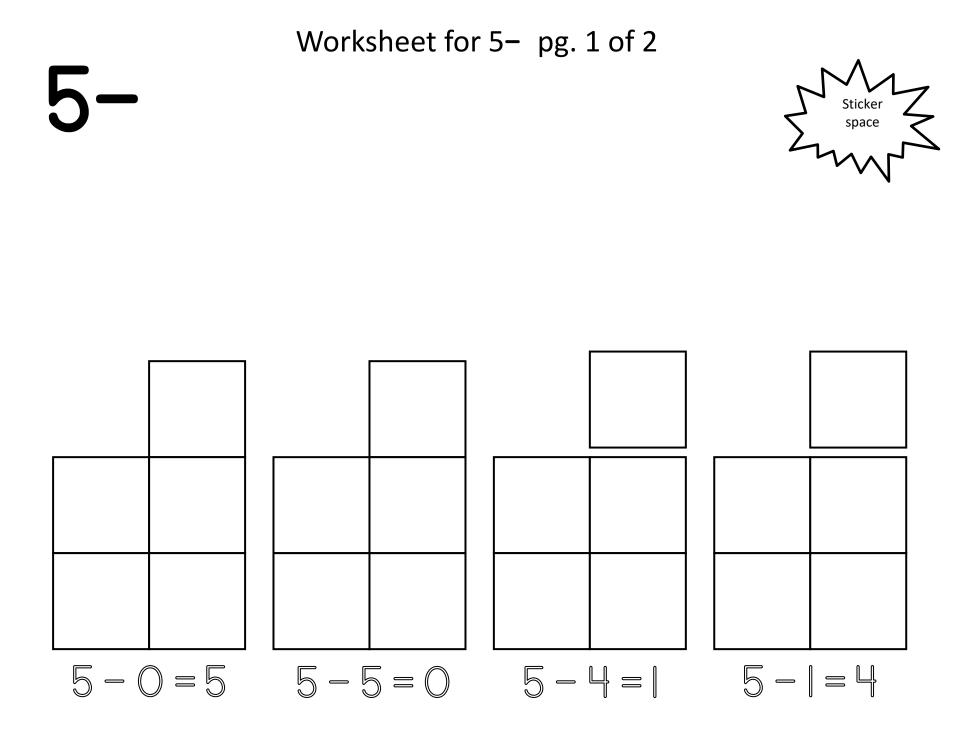

GROUP: Independent, 1 on 1, or small group

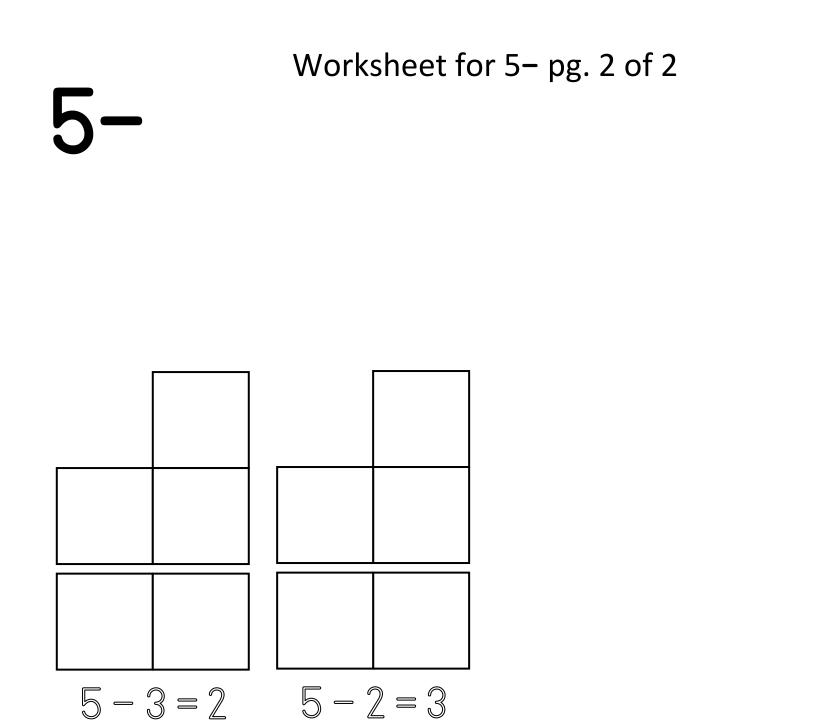

DIRECTIONS:Build with the manipulatives to show the partners of five. Use two colors for each set of partners, except 5-0, 5-5. (FIGURE 1)
Then, push the items off each square as you record your work with the crayons. (FIGURE 2)
Circle & then cross out the whole number pattern that represents the equation shown below the picture. (FIGURE 3)
In pencil, write over each equation after you finish its picture. (FIGURE 3)

Then, cover up the equations and Point and Say each equation to a friend. (FIGURE 4)

When you complete this activity, put a sticker in the Sticker space.

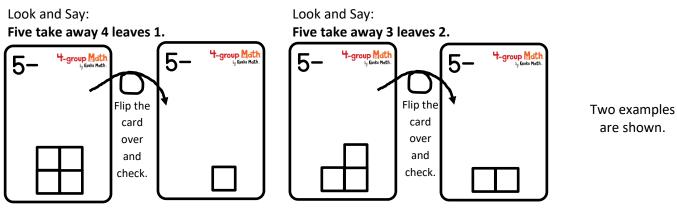

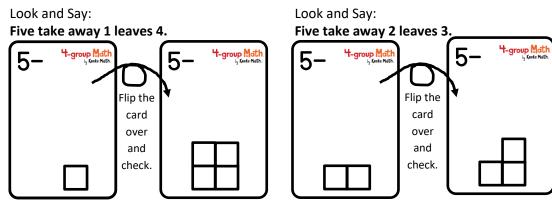

Activity 5 – Partner Flip Cards Directions

- **OBJECTIVE:** Complete the subtraction equations from 5
- **MATERIALS:** Activity 5 *Partner* Flip Cards for 5
- **GROUP:** Independent, 1 on 1, or small group
- DIRECTIONS: Cut out the three cards on the following page. Lay the cards on the table in any order with either side facing up. Look at one card. Say the equation that is represented: "Five take away __ leaves __." Flip the card over and check your answer. Continue for all the cards. Beginning with the sides now facing up, repeat the process. Continue until you give the correct answers for each card. When you complete this activity, put a sticker in the Sticker space.

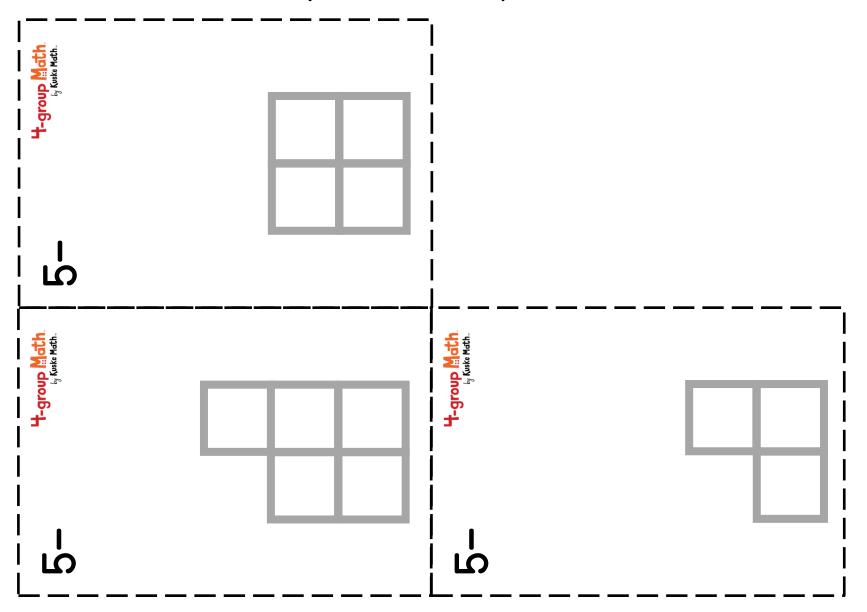

Beginning with the sides now facing up, repeat the process:

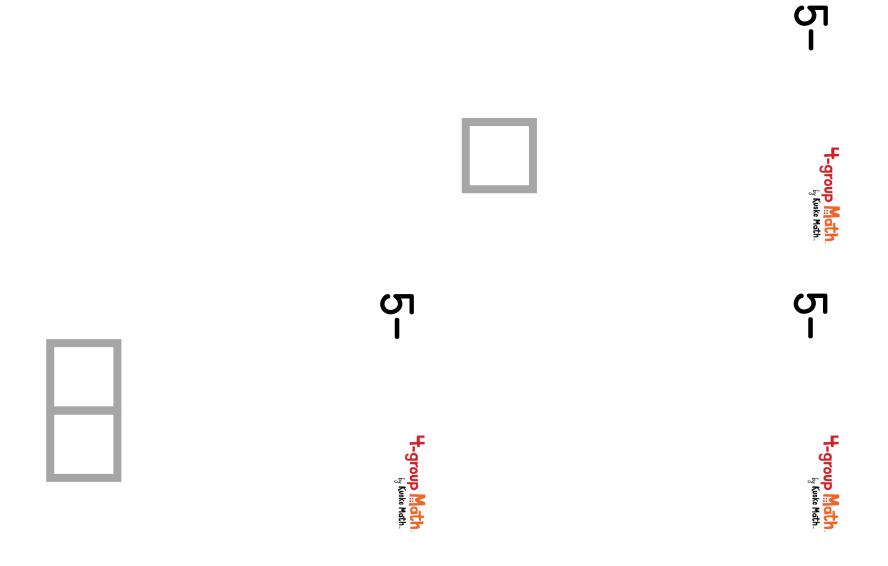

Sticker

space

Activity 5 – Partner Flip Cards for 5

Activity 6 – <u>Assessment</u> Directions

OBJECTIVE: Write and recite from memory the subtraction equations from 5, including the switched *partners*

MATERIALS: Activity 6 – Assessment Sheet or a blank piece of paper Pencil

GROUP: One child with teacher or another adult

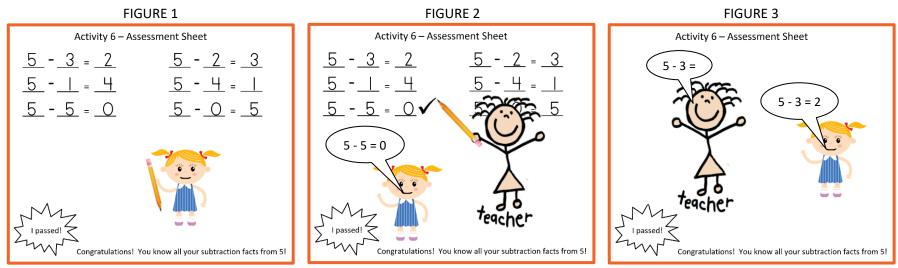

DIRECTIONS: On the Assessment Sheet or a blank piece of paper, write from memory all the *subtraction* equations from five, including the switched *partners*. It is okay for an adult to record for you if you tell them what to write. (FIGURE 1) Find an adult to "test" you.

The adult asks you to recite all your equations (in any order). (FIGURE 2)

Then, the adult says one equation and you complete the equation by supplying the answer. (FIGURE 3) Continue until all equations are said, including the switched *partners*.

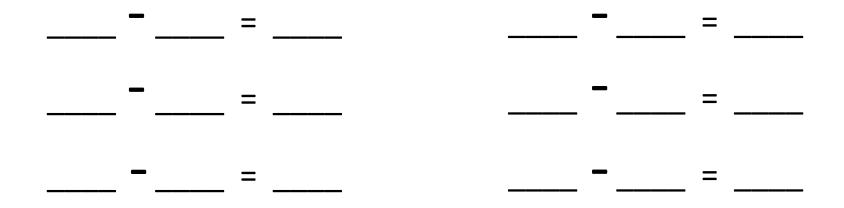

If you pass, put a sticker in the Sticker space.

If you do not pass, practice a little more by repeating two activities from Activities 1-5.

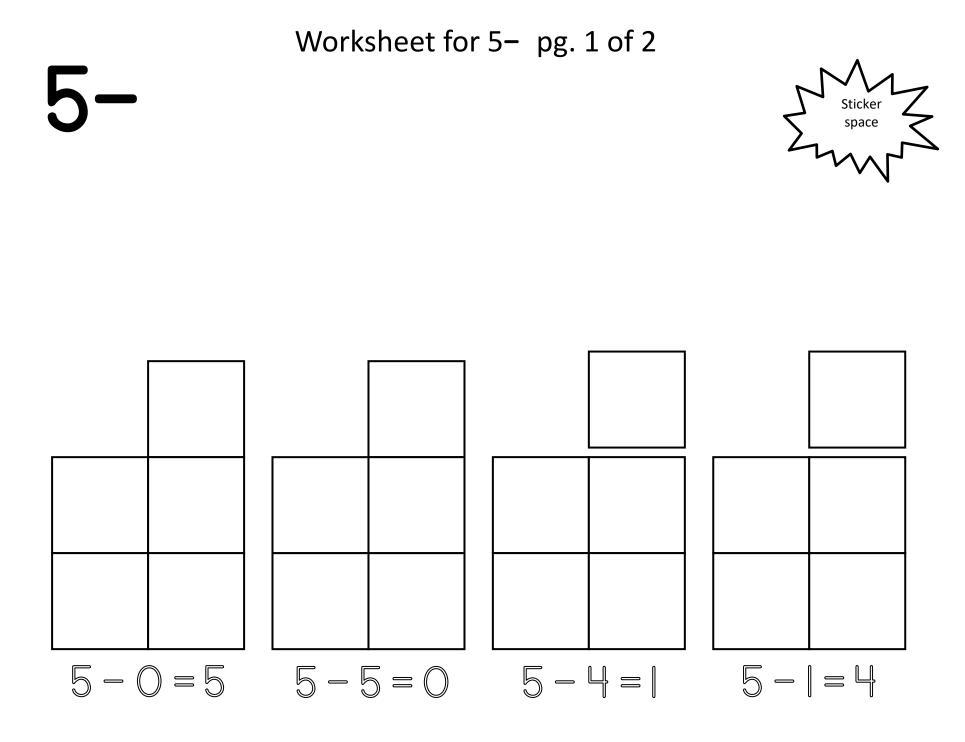

EXAMPLE:

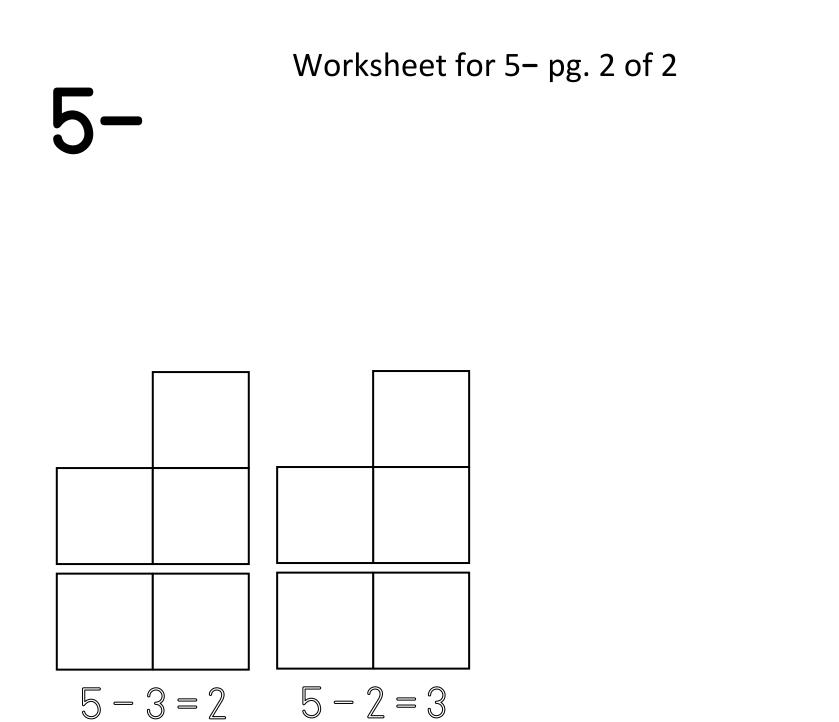

The adult says, *"Five take away three leaves____."* Child says, *"Five take away three leaves two."* Activity 6 – Assessment Sheet

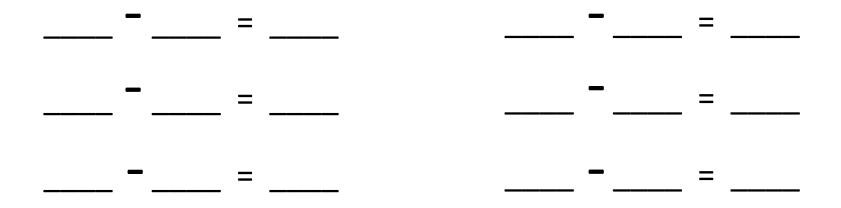

I passed!

Congratulations! You know all your subtraction facts from 5!

Activity 6 – Assessment Sheet

I passed! Congratulations! You know all your subtraction facts from 5!
