For each problem, pencil in the 4 you would break off to put with the 6 to make a 10. Write your answer in the box. When adding 6 to 7 you may break off a 3 from the 6 to go with the 7. When adding 6 to 8 you may break off a 2 from the 6 to go with the 8. When adding 6 to 9 you may break off a 1 from the 6 to go with the 9. Do what is easiest for you.

Show with numbers how you would break off a four to put with the six to make a ten. Write your answer on the line. When adding 6 to 7 you may break off a 3 from the 6 to go with the 7. When adding 6 to 8 you may break off a 2 from the 6 to go with the 8. When adding 6 to 9 you may break off a 1 from the 6 to go with the 9. Do what is easiest for you.

$$6 + 5 = \underline{11}$$

$$6 + 7 = \underline{\quad}$$

$$6 + 6 = \underline{\quad}$$

$$6 + 9 = \underline{\quad}$$

$$6 + 8 = \underline{\quad}$$
