

Directions to print your own Number Parade.

Print pages 2-12 on cardstock. Use landscape mode. Cut each page for the numbers 1-19 in half to make two Number Parade Cards.

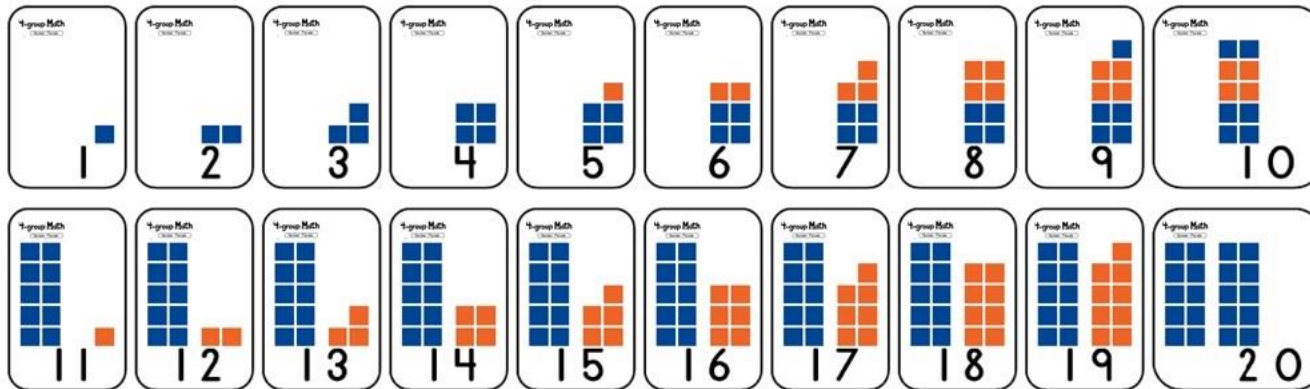

Trim the 10 and 20 pages on the dotted lines.

Laminate the cards if desired for longevity.

Post the Number Parade on a wall at child height. We post the layout shown below so we can visually compare the ones and teen numbers.

If you cannot post the Number Parade on a wall, use it on a floor or table top.

For more information on how to use the Number Parade, [click here](#).
