

Alaska

State outlook

As Alaska's population ages, older residents will play a critical role in the state's economic growth, fueling innovation and making economic and social contributions that benefit people of all ages. Policymakers, business leaders and elected officials must ensure programs and policies are in place to unlock the full potential of this economic engine.

Key findings

Alaska's 50-plus residents contribute more to the state's economy than their share of the population.

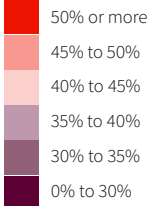

Their impact totals \$36 billion—43% of the state's GDP in 2024—while people 50-plus account for 32% of the population. This contribution will grow to \$66 billion by 2060 (43% of GDP), reinforcing their role as a key driver of economic growth.

The economic activity of Alaska's 50-plus population will drive substantial tax revenue for decades.

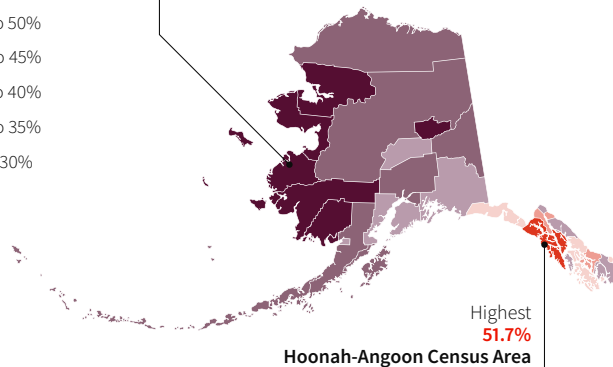

In 2024, the activities of people 50-plus supported \$2.2 billion in state and local taxes (38% of Alaska's total). That figure will expand to \$4.3 billion by 2060.

Where do people age 50-plus live?

% share by county, 2024

Lowest
20.7%
Kusilvak Census Area

Highest
51.7%
Hoonah-Angoon Census Area

Net 50-plus migration to Alaska in 2024

50-64 65-plus

Per-capita migration: -6.9 migrants per 1,000 50-plus residents
Rank: 50th nationally where states range from 10.6 (Idaho) to -9.9 (District of Columbia).

Overview: Economic impact of the 50-plus population

	2018		2024		2060	
	Impact	% of total	Impact	% of total	Impact	% of total
State GDP*	\$33B	42	\$36B	43	\$66B	43
Jobs	205,000	45	217,000	46	235,000	46
Wages and salaries*	\$18B	47	\$19B	49	\$33B	49
State and local taxes*	\$1.7B	37	\$2.2B	38	\$4.3B	37

The 50-plus cohort will grow from 32% of the population in 2024 to 32% by 2060

50-64 65-74 75-plus

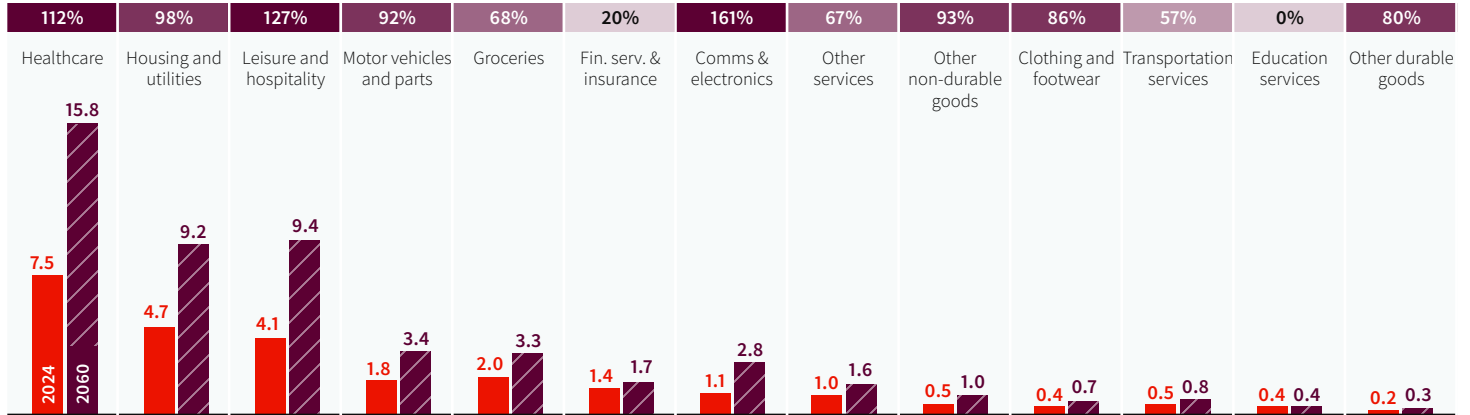

Alaska

Note: on this page, all charts depicting "50-plus spending" refer to consumption expenditure by households headed by someone age 50 or older.

As a major source of Alaska's consumer spending, 50-plus households will drive economic growth across sectors

Spending of the 50-plus population by product (\$ billion, 2024 prices)

% growth, adjusted for inflation

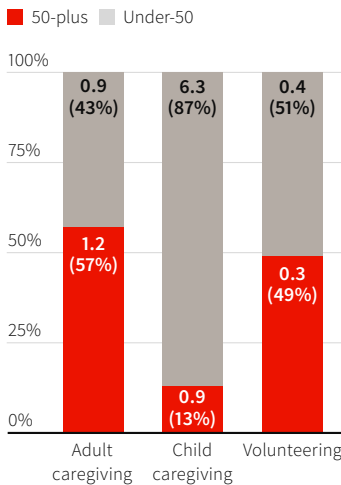

Unpaid contributions

Beyond their economic contributions, the 50-plus cohort also spends time engaging in vital activities like volunteering and caregiving for children and adults. The 50-plus population in Alaska contributed \$349 million in volunteering activities and \$1.2 billion in unpaid caregiving in 2024, with the average person spending 54 and 444 hours on each, respectively, over the entire year.

The 50-plus population provides \$2.4 billion in unpaid contributions

Value of unpaid activities, 2024 (\$ billion)

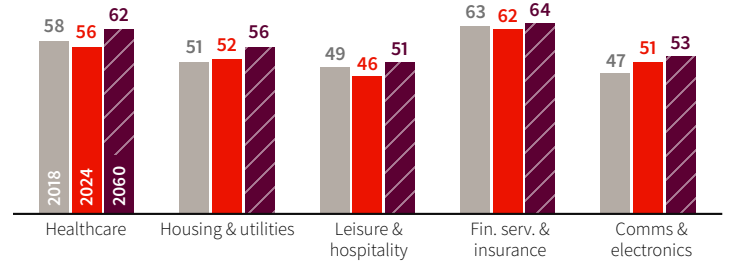

Note: values may not sum due to rounding

Alaska's 50-plus households were responsible for 51 cents of every dollar spent statewide in 2024. This will grow to 55 cents by 2060.

50-plus share of every dollar spent

Not only does the 50-plus population drive job creation across sectors, it also makes up a large part of the labor force.

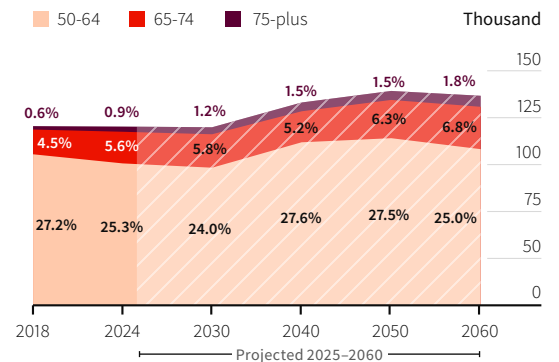

Which sectors saw biggest jobs impact in 2024?

Number of jobs supported by 50-plus activities and % of sector

Note: only top eight shown

Labor force: In 2024 there were 114,000 workers age 50-plus, representing 32% of the state's total labor force

Methodology

This profile details the contribution of the 50-plus population, both in-state and through interstate commerce, to the state's economy. The overall impact includes the direct effects of their spending, work contributions and taxes paid. It also includes the ripple effects this generates—via business supply chains and through the wages and spending of other workers. All forecasts are informed by data from REMI, the Bureau of Economic Analysis, Bureau of Labor Statistics, United States Census Bureau, Harvard's Joint Center for Housing Studies and Economist Enterprise's macroeconomic forecasts. For further details, see: <http://www.aarp.org/longevity>
