

The Longevity Economy® Outlook 2026

# Maine

## State outlook

As Maine’s population ages, older residents will play a critical role in the state’s economic growth, fueling innovation and making economic and social contributions that benefit people of all ages. Policymakers, business leaders and elected officials must ensure programs and policies are in place to unlock the full potential of this economic engine.

## Key findings

**Maine’s 50-plus residents contribute more to the state’s economy than their share of the population.**

Their impact totals \$53 billion—51% of the state’s GDP in 2024—while people 50-plus account for 44% of the population. This contribution will grow to \$96 billion by 2060 (52% of GDP), reinforcing their role as a key driver of economic growth.

**The economic activity of Maine’s 50-plus population will drive substantial tax revenue for decades.**

In 2024, the activities of people 50-plus supported \$4.8 billion in state and local taxes (46% of Maine’s total). That figure will expand to \$9.5 billion by 2060.

## Where do people age 50-plus live?

% share by county, 2024

## Net 50-plus migration to Maine in 2024

50-64 65-plus

Per-capita migration: +5.9 migrants per 1,000 50-plus residents  
 Rank: 6th nationally where states range from 10.6 (Idaho) to -9.9 (District of Columbia).

## Overview: Economic impact of the 50-plus population

	2018		2024		2060	
	Impact	% of total	Impact	% of total	Impact	% of total
State GDP*	\$44B	50	\$53B	51	\$96B	52
Jobs	427,000	51	454,000	51	501,000	52
Wages and salaries*	\$27B	53	\$32B	54	\$57B	55
State and local taxes*	\$4.1B	45	\$4.8B	46	\$9B	47

\*All values in this profile are adjusted for inflation to reflect 2024 price levels.

## The 50-plus population fuels economic growth, job creation and state revenue

Economic impact of the 50-plus population through 2060 (adjusted for inflation)

GDP (\$ billion, 2024 prices)

Labor income (\$ billion, 2024 prices)

State/local taxes (\$ billion, 2024 prices)

Jobs (thousand)

Note: diagonal shading denotes projected estimates

## The 50-plus cohort will grow from 44% of the population in 2024 to 46% by 2060

50-64 65-74 75-plus

# Maine

Note: on this page, all charts depicting "50-plus spending" refer to consumption expenditure by households headed by someone age 50 or older.

## As a major source of Maine's consumer spending, 50-plus households will drive economic growth across sectors

Spending of the 50-plus population by product (\$ billion, 2024 prices)

% growth, adjusted for inflation

### Unpaid contributions

Beyond their economic contributions, the 50-plus cohort also spends time engaging in vital activities like volunteering and caregiving for children and adults. The 50-plus population in Maine contributed \$960 million in volunteering activities and \$3.2 billion in unpaid caregiving in 2024, with the average person spending 54 and 438 hours on each, respectively, over the entire year.

#### The 50-plus population provides \$38 billion in unpaid contributions

Value of unpaid activities, 2024 (\$ billion)

Note: values may not sum due to rounding

### Maine's 50-plus households were responsible for 62 cents of every dollar spent statewide in 2024. This will grow to 65 cents by 2060.

50-plus share of every dollar spent

50-plus share of every dollar spent, for select categories (%)

### Not only does the 50-plus population drive job creation across sectors, it also makes up a large part of the labor force.

Which sectors saw biggest jobs impact in 2024?

Number of jobs supported by 50-plus activities and % of sector

Note: only top eight shown

Labor force: In 2024 there were 266,000 workers age 50-plus, representing 38% of the state's total labor force

### Methodology

This profile details the contribution of the 50-plus population, both in-state and through interstate commerce, to the state's economy. The overall impact includes the direct effects of their spending, work contributions and taxes paid. It also includes the ripple effects this generates—via business supply chains and through the wages and spending of other workers. All forecasts are informed by data from REMI, the Bureau of Economic Analysis, Bureau of Labor Statistics, United States Census Bureau, Harvard's Joint Center for Housing Studies and Economist Enterprise's macroeconomic forecasts. For further details, see: <http://www.aarp.org/longevity>
