

## Monitor fuel purchases and control costs

With fuel costs in constant flux, monitoring and optimizing fuel consumption becomes increasingly vital to help manage to your bottom line. At Element Fleet Management, our Fuel services offer the ultimate in convenience to drivers while giving fleet managers built-in controls, security and cost savings.

The Element chip-and-PIN fuel service card provides drivers with near-universal acceptance across thousands of gas stations in Canada. Data is captured on each purchase giving you the ability to control your fleet expenses and identify out of policy exceptions. The incorporated chip-and-PIN technology ensures unparalleled security and mitigation of risk against fraud and abuse. In addition, reporting and analytical tools will help you quickly identify trends and opportunities to reduce costs.

Reduce costs, increase control and simplify reporting with our fuel services program.

## Reduce fuel costs and protect against fraud

### DRIVER CONVENIENCE

#### Convenient card for purchasing fuel

- Driver support for fueling and PIN assistance
- Near-universal acceptance (wherever Mastercard is accepted)
- Pay-at-the-pump convenience at most major suppliers purchases

### SECURITY

#### Chip-and-PIN technology protects the card from fraud and misuse

- Real-time decline email notifications available for cardholders and fleet managers
- Card may be terminated quickly and easily
- Control available purchases by opening/closing merchant category codes
- WEX/EFS fraud detection application provides 24/7 detection and alert generation for suspicious purchases

### CONTROL

#### Extensive detail is captured on each purchase, giving you immediate control of your fleet expenses

- Exception reports highlight vehicles operating outside fleet parameters
- Highly configurable account controls such as dollar & velocity limits, merchant categories
- Account level authorization controls can be set to Daily, Daily/Weekly, Daily/Monthly

- Transaction reports specify fuel type, fuel site, non-fuel transactions and more by vehicle
- Receive one consolidated monthly bill
- When you visit Element preferred vendors below you are eligible to receive a discount on fuel spend

### REPORTING AND BENCHMARKING

#### Web reporting with powerful analytics

- Customize reporting to meet your specific needs
- Detailed exception reporting for fraud monitoring
- Integrates with other Element services, including Maintenance
  - manage preventive and other maintenance activities
  - keep track of all vehicles to determine the best time to sell, minimizing lifecycle costs
- Access to the deepest fuel data benchmarking in the industry
  - fuel data is benchmarked against national provincial fuel averages and similar fleets to gauge how a fleet is performing
- Detailed transaction data analysis helps inform future vehicle selection discussions to reduce fuel consumption

Branded stations  
in B.C. and Alberta
