

Increase driver safety and reduce corporate risk

You need to make sure you have safe drivers on the road. We're here to make that happen. Whether your fleet consists of cars, trucks or equipment, our DriverCare suite of safety products can be personalized to meet your specific needs.

Element helps you identify high-risk drivers to proactively manage your risk. We look at historical data such as driver motor vehicle records and prior collision history, as well as active data from driver behavior on the road to craft a comprehensive driver risk profile. Online driver safety training helps at-risk drivers improve their driving behavior and skills. And for the collisions that do occur, we offer an integrated Collision Management solution that reduces costs and gets vehicles back on the road quickly.

Better drivers make for a safer fleet. We provide the solutions you need to ensure safe drivers.

DRIVERCARE SUITE OF SAFETY SOLUTIONS

BUNDLED SERVICES FOR MAXIMUM RISK REDUCTION

Element services work together for maximum effectiveness

Each of Element's DriverCare services mitigate fleet risk. But the best protection comes from a seamless bundle of services that blends driver license status checks, collision history review, integration of other risk data, behavioral assessments and remedial training.

To assist clients in achieving this best-in-class level of fleet safety, Element offers two discounted service bundles:

- **DriverCare Risk Manager bundle** - Includes all services for MVR Monitor and DriverCare Risk Manager
- **DriverCare CoPilot Pro bundle** - Includes all services for MVR Monitor, DriverCare Risk Manager and DriverCare CoPilot

solutions continued on next page...

Safety

MVR MONITOR

Active management & reporting of driver record/abstract checks

Leverages alert systems for each U.S. state (where available) to monitor for changes in motor vehicle convictions and license status.

- Identify high risk pre-hires, employees and secondary drivers via motor vehicle record/abstract checks applying client defined points to each violation type
- Facilitate driver authorization process
- Standardized motor vehicle record/abstract grading across all states/provinces allows for direct comparisons across your fleet
- Documentation stored on secure website with 24/7 access to driver records
- Includes access to our online standard driver safety training modules on a pay per use basis

MVR MANAGER

For drivers in Canada & risk-tolerant fleets

For fleets with drivers in Canada, or who are willing to take on a higher risk level, Element offers our MVR Manager program. This program offers the same capabilities as MVR Monitor program, except motor vehicle/abstract checks are performed and billed on a per request basis, rather than continually monitored through state alert systems.

DRIVERCARE RISK MANAGER

Includes all the features of MVR Monitor and/or MVR Manager plus:

- Automated points assignment for various types of events roll up into client defined risk levels
- Scorecards highlight risk rating and events for individual drivers
- Motor vehicle record/abstract data along with Element's collision and safety training data provide a complete driver risk picture
- Unlimited online standard training modules included for at-risk, selective or all drivers
- Safety policy module developed based on your fleet policy

ADDITIONAL SAFETY PROGRAMS

DRIVERCARE COPILOT

Mobile connected solution with active measurement of driver behaviors

- App uses patented smartphone technology to assess and score driver behaviors predictive of crash risk including:
 - Phone interaction
 - Speeding
 - Hard braking
 - Hard cornering
 - Harsh acceleration
- Engages drivers through competition and gamification to self-manage and improve driving behaviors
- Safe Driving tips based on behavior trends
- Driver training modules assigned based on events and behavior trends with optional subscription to DriverCare Risk Manager
- Scores integrated into Risk Manager

DRIVERCARE CONNECT

Vehicle connected solution with active measurement of driver behaviors

- Uses telematics data to assess and score driver behaviors predictive of crash risk including:
 - Seat belt use
 - Speeding over the limit
 - Speeding over a threshold
 - Hard braking
 - Hard cornering
 - Harsh acceleration
- Driver training modules assigned based on events and behavior trends
- Scores integrated into Risk Manager
- Requires DriverCare Risk Manager subscription

ADVANCED DRIVER SAFETY TRAINING MODULES

In addition to our standard online training, Element offers advanced training modules for passenger vehicles, and light, medium & heavy-duty truck drivers covering specialized topics applicable to particular jobs, industries or situations.
