Connected Solutions
Transforming your vehicle data into actionable insights

Our end-to-end approach offers proactive consulting to identify and manage the "best fit" product to meet your specific needs. From full program administration to simple data solutions we have you covered.

Data without action is simply data. Here at Element, we provide meaningful and actionable intelligence to dramatically enhance your vehicle and driver performance. Our programs provide valuable insights to help you reduce total emissions, fuel costs, operating costs and more while improving driver safety, service response times and the health of your vehicles.

Our connected solutions provide more accurate and real time data empowering greater, deeper dive analysis that will take the performance of your fleet to a whole new level.

Increase driver productivity and safety while reducing operating costs

BENEFITS OF ELEMENT'S CONNECTED SOLUTIONS

- Improve productivity and the cost per mile/kilometer footprint
- Reduce administrative burden while enhancing safety and compliance
- Integration of telematics data to produce new insights and better user platform experience
- Improve field efficiency
- Expand vehicle and equipment utilization
- Increase driver safety and minimize collision costs
- Lower overall maintenance costs
- Reduce unnecessary fuel consumption
- Identify underutilized vehicles
- Reduce costly idle time
- Improve operational efficiencies
- Reduce your carbon footprint

THE ELEMENT DIFFERENCE

- Element's in-house market expertise helps identify and manage the product that best fits your needs
- Proactive consulting identifies meaningful and actionable intelligence, enhancing vehicle and driver performance
- Integrated administrative and database capabilities allows single source data management
- Reporting/policy consultations and personalized dashboards craft metrics to fit your business
- Determine areas for policy improvement, identify high-risk behaviors, and create client configured driver scorecards
- Proximity to vehicle and driver during lifecycle for optimized administration including inventory + vehicle status based on activation management

CONNECTED SOLUTIONS

Telematics
Driver and Vehicle Dashboard Hardware

Operations focused solutions delivering productivity, fleet and safety unique solutions such as ELD, satellite, asset tracking, dispatch capabilities and cameras

CoPilot
Mobile Connected

Safety focused views into risk through collection of traditional driver behavior data – i.e., speeding + distracted driving trends – delivered in a driver friendly gamified scorecard view

QConnect
OEM Connected + Third Party Data

Fleet focused streamlined solution delivering day to day baseline fleet capabilities including location as needed, diagnostics and basic driver behavior and policy compliance tools

Base Connectivity
OEM Connected Data Solution

A simple vehicle data solution using OEM connectivity to provide you with the most critical data to manage your fleet's utilization

Telematics consultants available for policy consultation, analytics projects and ongoing performance measurement (add on option to Telematics and QConnect)
