

RAT variables and victim age groups – Kruskal-Wallis test						
	Mean Ranks				Kruskal-Wallis H	<i>p</i>
	Victim group (18–54)	Victim group (55+)	Non-victim group (18–54)	Non-victim group (55+)		
Computer familiarity (How familiar would you say you are with computers?)	1410.47	1169.2	1306.97	1062.64	84.666	0.001
Technical Guardian – Currently in place	1499.13	1251.6	1034.44	1127.2	200.834	0.001
Technical Guardian – Put in place because of a prior victimization	1624.94	1171.51	1081.1	1039.83	461.785	0.001
RAT Scale (PC-time + Familiarity)	1270.19	1081.59	1192.42	934.44	83.535	0.001
Technical Guardian - Pairwise comparisons with Mann–Whitney test						
	Mean Ranks			Mann–Whitney U-stat	<i>p</i>	
<i>Technical Guardian - Currently in place</i>						
Victim group (55+) vs. Victim group (18–54)		513.71	644.45	114,910	<i>p</i> < 0.01	
Victim group (55+) vs. Non-victim group (55+)		432.03	388.14	70774.5	<i>p</i> < 0.05	
Victim group (55+) vs. Non-victim group (18–54)		636.85	531.6	106,473	<i>p</i> < 0.01	
<i>Technical Guardian - Put in place because of a prior victimization</i>						
Victim group (55+) vs. Victim group (18–54)		458.77	685.68	97285.5	<i>p</i> < 0.01	
Victim group (55+) vs. Non-victim group (55+)		440.04	395.48	73,299	<i>p</i> < 0.01	
Victim group (55+) vs. Non-victim group (18–54)		607.69	563.04	125,853	<i>p</i> < 0.05
