

# Exercise bar

EP-SKS-BBAL01

## CARACTERISTICS

Age group: 5-12 years old

Safety area: 17'-1" x 12'-2" (5.21m x 3.71m)

Exercise bar for ballet or a multitude of training movements. Can be installed in pairs to be used as parallel bars.

The equipment is designed to be installed in 12" (0.30m) of resilient material (EWF, rubber or sand).

## MATERIALS

Support bars: brushed stainless steel, 1-3/4" diameter;

Side sections: powder-coated stainless steel, 1-3/4" diameter.

## INSTALLATION

Concrete poured into 12" (0.3m) diameter sonotubes. Depth to be determined according to the depth of the frost line in your region.

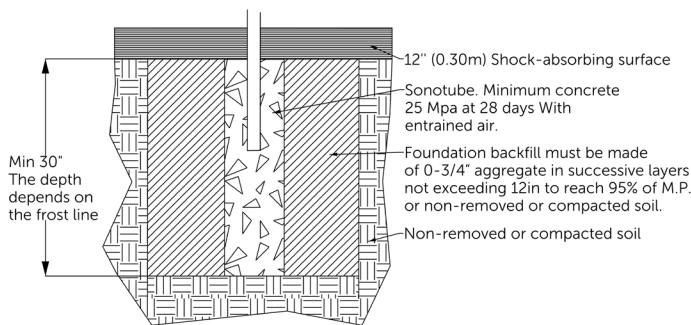

The concrete used for the foundations must be at least 25 Mpa at 28 days with entrained air.

Foundation backfill must be made of 0-3/4" aggregate in successive layers not exceeding 12in to reach 95% of the P.M.

## PLAY VALUE

Space-saving equipment for a wide variety of movements requiring support.
