NEW HABA PRODUCTS IN FALL 2022

Logic! GAMES

From the popular Logic! series comes the next game for colorful puzzle fun. Following the Logic! CASE puzzle cards, HABA now presents the smart **logic and hidden object game „Where is Wanda?“**. 60 puzzles with an increasing degree of difficulty await children ages 4 years and older, whose task is to track down the little monster Wanda in the colorful hustle and bustle of the house.

The children start by building the house. Afterwards, they help the Monster family in their search by assigning the monsters certain rooms and thereby skillfully getting on Wanda's trail. Clever use of materials: The base of the game box becomes a hidden

object picture in the monster house. A colorful puzzle game that trains precise observation and children's first combination and spatial assignment skills – in a super fun way like all HABA games!

THE KEY

In fall 2022, two new cases from the much-loved „The Key“ series await: „The Key – Royal Star Casino Burglary“ and the particularly tricky case „The Key – Escape from Strongwall Prison“. The detective game has already awakened the investigative instincts of children ages 8 years and older with „The Key – Murder at

the Oakdale Club“, „The Key – Theft in Clifford Villa“, and „The Key – Sabotage at Lucky Llama Land“.

Thanks to varied rounds and countless routes to the finish, no two games are the same. The games can be played competitively or alone.

Royal Star Casino Burglary

In „**The Key – Royal Star Casino Burglary**“, a spate of burglaries shakes the gambling world. But

888 age
10+ 0+8 players
1-4 20-30 minutes

how on earth did the three perpetrators access the sensitive data? Players must put together clues about safes, perpetrators, codes, and times of the crime to deduce the correct number code. In the game cards for this case, the torn edges of currency

straps must be examined, elevator movements must be put in the right order, and code tiles must be correctly put together.

Witness statements about the activities on the evening of the crime add extra suspense.

THE KEY

Escape from Strongwall Prison

The trickiest game in the series so far is waiting for all those who outshine even Sherlock Holmes. „**The**

Key – Escape from Strongwall Prison takes place in the prison where all the perpetrators of the series so far are serving their sentences. But now the three dangerous gang bosses have broken out! Investigators are searching high and low and racking their brains. Players must

put together clues about the types of breakout, the gang bosses, a laundry cart used in the escape, and the perpetrators' hideouts to deduce the correct number code. On the game cards, the tiniest changes to the piles of laundry must be examined and the navigation route must be followed on the map.

And in the end, all the information is worth nothing without the gangs' contacts. But who is in which gang and who is lying when and about whom? Clever mystery fans can be sure that they'll successfully outsmart the culprits using skill, tactics, and a good nose for clues.

DID YOU KNOW?

Game Developer Thomas Sing was born in 1961 and was already entered into the Guinness Book of Records during his school time with a world record in the game „Pachisi“. The qualified economist lives in Constance, where he operates

a large kiosk with friends. This gives him enough time for his hobbies. Mathematics, game theory, reading detective novels, and, of course, inventing games.

3D ARRANGING GAME

WONKY TOWERS

HABA presents this classic toy in a new edition: Building blocks with a difference! In addition to the familiar rectangular shapes, the 3D arranging game Wonky Towers also features interesting geometric wooden blocks. Triangles, steps, and colorful wedges ensure a varied and fun building experience. Let your creativity run free and create wonky towers, wobbly bridges, or sloping figures.

The enclosed template cards give young builders new ideas – in three levels of difficulty. The second **3D arranging game set „Wonky Towers – Balls“** offers even trickier building options and complements the basic set with circular shapes and matching bridge blocks. The unusual shapes not only ensure great building fun – they also help to develop fine motor skills, concentration, and hand-eye coordination through play.

BABY BOOKS

What could be better than being transported into another world by a great book? Budding readers aged 10 months and older can use the **HABA baby books** to practice how it feels to hold a book in their hand and develop their creativity.

The books are 17x13 centimeters in size and are easy to grip. The five colorful pages made of sturdy beech plywood can be easily flipped over thanks to the grip hole on the side and are held together by a cord. There are four colorful HABA stories to discover:

In the **„The Orchard“ edition**, Theo the Raven from the beloved, classic HABA game invites you into his world. Children can go on adventures here with Theo and his friends.

In the **„Dinos“ edition**, readers go on a journey through time. There's a great deal to discover and learn from the heroes of prehistoric times.

In the **„Forest Animals“ edition**, children get to know the fox and its friends and explore the forest and its many inhabitants together under the protection of the trees.

In the **„Tractor“ edition**, children learn all about the farm and its inhabitants. Children sit on the tractor with the farmer, enter the barn, and dive into a wildly colorful world.

GUARDIAN ANGELS

Go through life protected from the very beginning – with HABA's new **guardian angels**. Whether for a birth, a christening, a birthday, or just because, the cute angels are the perfect companions for babies and children.

The **Nora and Mara mini dolls** are made of cotton and polyester and are great for any doll parents. Measuring 17 centimeters, they fit into any stroller

and stand faithfully by children's side.

When babies need their pacifier, it should be within easy reach. Parents don't have to search for long thanks to the handy **guardian angel pacifier chain** in a child-friendly design.

Fastened to your child's clothes with the handy clip, the pacifier chain will encourage them to look and play. Thanks to the practical silicone ring, the pacifier is always where it belongs – and the guardian angel is always close by.

The **guardian angel stroller chain** invites children to look and discover so they won't get bored even on longer rides in the stroller. The two angels fly towards the star, where a little bell makes the child want to grab and shake it with every movement. The 67-centimeter chain fits nearly any stroller or car seat and therefore accompanies the child wherever they go.

Discover, touch, grasp the world: Another heavenly companion is the **guardian angel dangling figure**, which accompanies babies in their first months of life. The 21-centimeter figure can be attached to the car seat, cot, or play gym like a mobile and hovers protectively over the action. Whether at home or on the move – **the little guardian angel will put your**

child in a good mood and the little bell in the middle of the grasping ring invites them to shake and grab – developing their fine motor skills through play.
