

HABA

OUR JOURNEY INTO THE FUTURE HAS BEGUN

NEW HABA PRODUCTS IN SPRING 2022

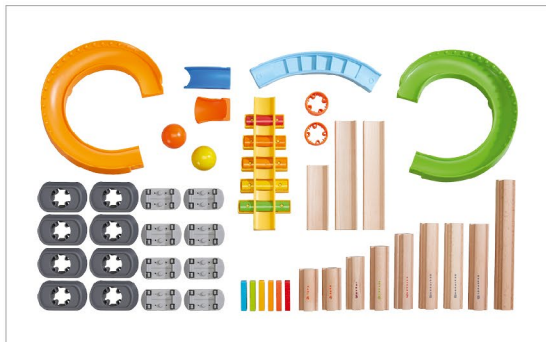

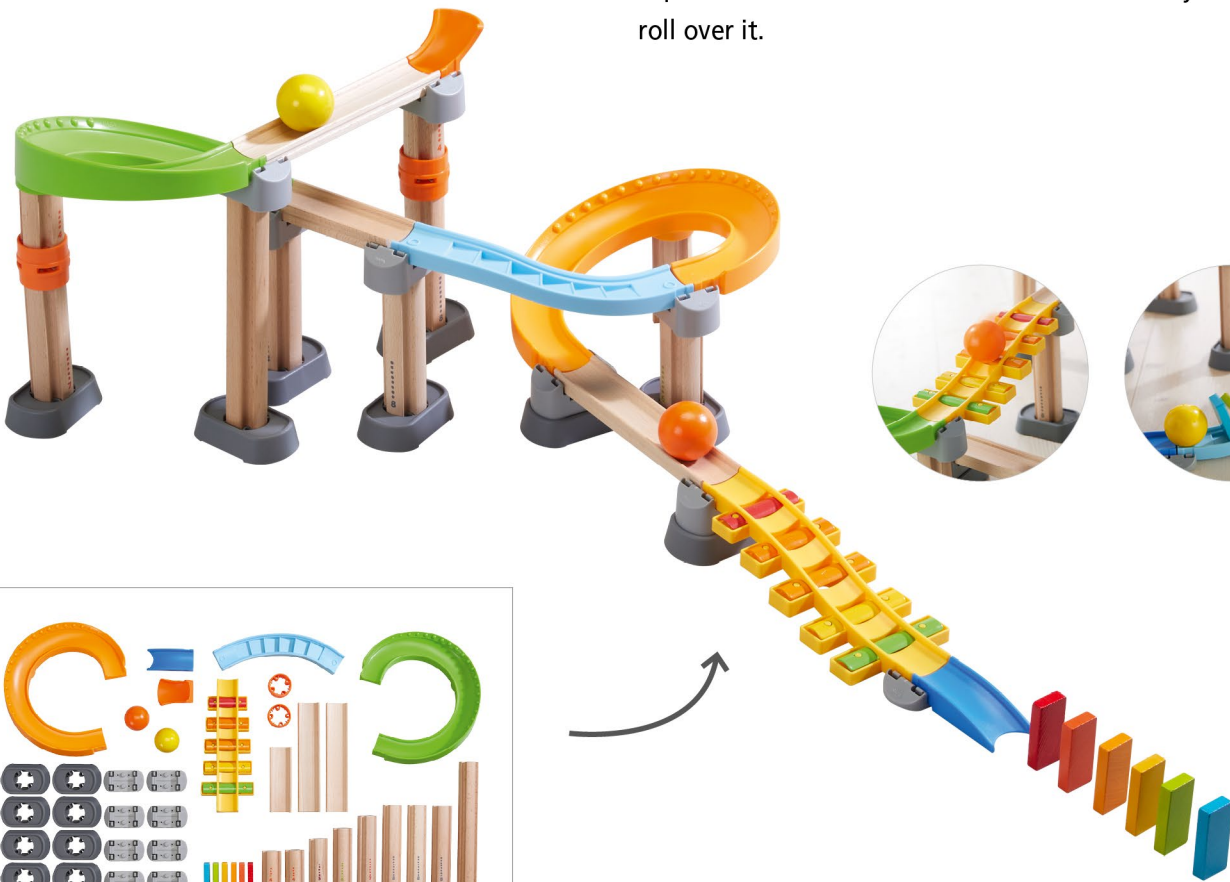

A young child with light brown hair in pigtails is sitting on a light-colored wooden floor, focused on playing with a colorful wooden ball track toy. The child is wearing a light-colored long-sleeved shirt with a small animal pattern and dark grey pants. They are holding a small orange ball in their right hand. The ball track is made of wooden beams and colorful plastic pieces in green, yellow, orange, and blue. It features a series of ramps and a bridge. A yellow ball is at the end of the track. In the background, there is a wicker basket filled with blue and white items, possibly laundry or toys, and a white rug.

TAKING THE STAIRS NEVER SOUNDS SWEETER THAN ON A KULLERBÜ BALL TRACK MELODY DOMINO

The colorful world of Kullerbü is growing – Melody Domino has been added to the popular HABA range.

Little ball track fans ages two and up can add music and momentum to their tracks with the colorfully designed set. In the middle are five colorful sound elements, which emit sounds every time the ball rolls over them. Steep curves and various heights make the balls race particularly fast. In line with the flexible system concept, the Kullerbü Melody Domino can either be used individually or combined with other tracks for even more playing fun. The Kullerbü Melody Domino is primarily made of natural wood from local sustainable forestry. The Melody Domino can also be used with the many small and large vehicles in the HABA range expansion sets – and create a little concert every time they roll over it.

DID YOU KNOW?

We take pride in our wood from the bottom of our hearts!

In 2021, the best wood mechanic in Germany was once again from the HABA FAMILYGROUP. Since 2006, apprentices from the HABA FAMILYGROUP have been honored 12 times by the Association of German Chambers of Industry and Commerce for their excellent training.

TIP

Imagination needs freedom! When building ball tracks, children are in motion with their whole body. Whether sitting, kneeling, or spreading their arms out – children need plenty of space on the ground when building.

SET SAIL TOWARD PLAYING FUN

Terra Kids believes that life's better outside! The most important thing is encouraging movement and discovery, creating shared family experiences, and supporting scientific curiosity.

The latest addition to the outdoor range is all about casting off – the new Terra Kids Catamaran Kit transforms children into real sailors. Easy to assemble and then nothing stands in the way of sailing adventures. The

included building instructions guarantee crafting fun for skippers of all ages. Pressed cork, high-quality wooden masts, a robust sisal cord and two cotton sails transform into a compact sea-going

vessel in no just a few steps. Environmentally friendly materials make the double-hull catamaran a real all-rounder. Whether in the ocean, lake, or bathtub – optimal flotation properties promise fun experiences in any environment. Thanks to the high-quality material selection, the robust catamaran can also easily withstand waves and other challenges on exciting adventures.

A sailboat that makes discovering nature even more fun!

HIDE AND GO SLOTH!

In addition to the little Australian friends, a sloth is also waiting to make children's eyes light up. The new movement game "Hide and Go Sloth!" invites searching, grasping, balancing, and cuddling. There are many possibilities to discover in free play – what is the sloth called? Where is the best place for it to hold onto with the magnets in its arms? The package also includes five new favorite spots such as the watering hole, the sunny spot, or the fruit bush, which can be distributed throughout the room and discovered together. If you prefer to go on a longer journey in the balancing game, first roll the die to see where the sloth wants to go.

On the child's head? Piggyback? Or on your hand? It all starts with the favorite spot, just across the room. The children are constantly interacting with the soft toy and must balance it skillfully. Another play option is to hide the sloth and then try to find it again in a creative search game. One to four children, from the age of two, experience a fun adventure that is constantly entertaining thanks to the fun ten-minute game duration. And once the exciting movement game is over, the cute fabric sloth is ready for a cuddle.

DID YOU KNOW?

Little children are real explorers. They look, grasp, play, learn, try things out, and experiment. In cooperation with education specialists and game developers, HABA has created the „My Very First Games“ series especially for them. In free play, children discover the game material and familiarize themselves with it. Because toddlers don't yet have any experience with board games, games in the „My Very First

Games“ series have particularly simple rules. Depending on the game, the game ideas either increase in difficulty or there are different variants. Games in the My Very First Games series consistently offer new incentives that support age-appropriate early childhood development and remain interesting for a long time... as well as being a lot of fun.

MY VERY FIRST PLAYING FUN

With the new HABA Koala series, nine cute little bears find their way into the children's room. From clutching toy to fabric book – the bear family accompanies children from the very beginning as they discover all their senses. Grasping, feeling, listening, seeing – the various attention grabbers made of high-quality materials playfully support early movement sequences and bring a smile to the faces of the littlest ones. Tingling bells, soft fabrics, squeaky koala noses, and fun rustling effects invite adventurous exploration.

The plush roly-poly koala puts everyone in a good mood – when bumped, it spins in a circle, cheerfully swaying back and forth. The cuddly playmate is sure to become a best friend and also trains the baby's motor skills during play.

When out and about, colorful elements on the pram decoration koala invite observation and discovery. A matching pacifier chain koala can be easily attached to clothing with a practical clip.

The new Koala clutching toy comes in two exciting designs: One made of robust beech wood with a cheerful little bell and the other as a cuddly version made of soft cotton, with early grasping rewarded with a fun rattle sound.

The discovery cushion koala and the discovery spiral koala, with their various fabrics, ensure that there is never any boredom in the playpen or crib.

The fun discovery ball koala rattles during play, inviting children to observe and grasp. A special highlight is the integrated squeaker and crinkle foil.

In addition to the squeaker nose, the water play mat koala ensures long-lasting entertainment with its cool effects. The mat supports fun motor skills development in the prone position.

The soft fabric book koala, with its exciting haptic and play elements encourages imagination and storytelling. The Koala series products complement each other perfectly and cover all areas of life for little explorers from the very start.

A PLAY COMPANION TO FALL IN LOVE WITH MAXIME BABY DOLL

There is a new baby doll in the HABA range for children from 1.5 years of age – Maxime invites you to snuggle and cuddle. The name and features consciously give children the freedom to choose between having a boy or a girl as a doll baby. Extensive accessories make playing fun even more varied. Stockings and the bib can be removed and put back on – plus the diaper, swaddling garment, and cap are all reversible for even more color combinations and looks! Maxime will always be perfectly dressed for any story the children come up with. A particularly practical feature is that the pacifier magnetically sticks to Maxime's embroidered face and can be securely attached with the pacifier chain. Maxime is made in the usual cuddly soft HABA quality. And if the doll does get dirty during play, a bath in the washing machine at 30 °C makes it shine like new again.
