Printing inks requirements for HABA product packages valid from the 1st January 2023

Dear Sir or Madam

Due to amended printing ink requirements for packaging, we are engaged to comply the following new regulations from the 1st January 2023.

Ban of substances occurring as chemical compounds in mineral oil:

- **MOAH** (Mineral Oil Aromatic Hydrocarbons)
- **MOSH** (Mineral Oil Saturated Hydrocarbons)

The ban applies to printing inks of the French market having a MOAH-concentration > 1% from the 1st January 2023.

The regulations for MOSH-concentrations are unchanged at this time.

From the 1st January 2025, the restriction is already valid for printing inks with an MOAH-concentration > 0,1% and will be extended by the ban of printing inks with an MOSH-concentration > 0,1%.

Since we cannot differentiate goods specifically for the French market and goods for the global market, these regulations apply to all HABA packages!

Please check the inks you are using and confirm that they do not exceed the values of the ingredients listed above or that they are free of it.

If the inks you are using do not apply to these requirements, we ask you to list them in the attached file.

Thank you for your help!

Kind regards

HABA Sales GmbH & Co. KG

i.V. Steffen Müller
Director Procurement
