

Outdoor fun with Terra Kids: Awaken the spirit of discovery with new outdoor products

Bad Rodach, November 2022 – Whether in the forest, city park or small garden, there is always plenty for children to discover and experience outside in the fresh air. The real adventure usually starts here, as they can move freely, explore their surroundings and use nature as a playground. Terra Kids outdoor products offer everything nature explorers need both in the countryside and in the city, taking the experience to the next level.

With the **Terra Kids Squirrel Feeder Kit**, little explorers can easily become wildlife protectors. The house is made of **robust material** and can be assembled in no time then filled from the front with nuts and other feed. An acrylic panel on the front means that the fill level can be checked from the outside at any time. **Particularly clever:** The roof overhang of the house ensures that the feed always remains clean and, most importantly, dry. In this way, children not only contribute to the **preservation of biodiversity**, but also experience the joy of **observing** animals.

Terra Kids offers real children's tools for those who dare to venture outdoors more and wish to become particularly active. The **Terra Kids Handsaw** opens up completely new possibilities for little ones to develop and create individual works. Thanks to its child-friendly, ergonomically shaped handle, the saw sits securely in the hand and achieves clean cuts effortlessly from the very first attempts. The **latching protective cap** also guarantees safe transport.

The handsaw from Terra Kids **teaches children how to use tools responsibly at an early stage and supports their fine motor skills, concentration and endurance** – naturally under supervision and with the help of grown-ups. Children's tools for wood are particularly suitable to start with, as wood is a soft material that is very easy to work with.

Go out, collect, drill, connect – children can build their favorite dinosaur from natural materials with the **Construction Set Dinosaurs** from the popular **Terra Kids Connectors** series. The connectors and end pieces included in the clever construction set transform branches, leaves, cork and more into moving fantasy figures. The instruction booklet shows how the material can be assembled into four different dinosaurs and gives particularly creative inventors inspiration for further designs. The Construction Set Dinosaurs from the Terra Kids Connectors series encourages imagination and creativity for the little ones and provides them with exciting outdoor play companions.

- includes hand drill and instruction booklet
- ingenious construction kit for designing your own dinosaur figures and imaginative natural toys
- robust connectors for movable figures made of natural materials
- with material for four dinosaurs according to instructions or many more own creations
- encourages creativity and imagination

About HABA

HABA has made it their mission to bring joy to children. At the same time, children also develop abilities such as social, fine motor skills, and communication skills. Our products allow children to develop at an age-appropriate level and without pressure. Our toys allow us to accompany babies and toddlers in all their individual developmental stages. We go on expeditions and adventures in nature with children and our Terra Kids outdoor products. People of all ages come together at the table with our family games. We support children and their families. Every day. From the very start. For a lifetime.

About the HABA FAMILYGROUP

For over 80 years, the HABA FAMILYGROUP has been enriching families and institutions with high-quality products in the core areas of family life, games, education, movement, clothing, and furniture. Under its umbrella, it unites the well-known brands HABA, JAKO-O, FIT-Z, HABA Pro, and HABA Digitalwerkstatt. Since its foundation in 1938 by Eugen Habermaass, the HABA FAMILYGROUP, based in Bad Rodach, has been owned by one family. The CEO is Tim Steffens. The company employs around 2,000 people and generates an annual turnover of around 360 million euros.
