

## **January 2026 US Cutting Tool Shipments Totaled \$220.7M, Up 9.9% From January 2025**

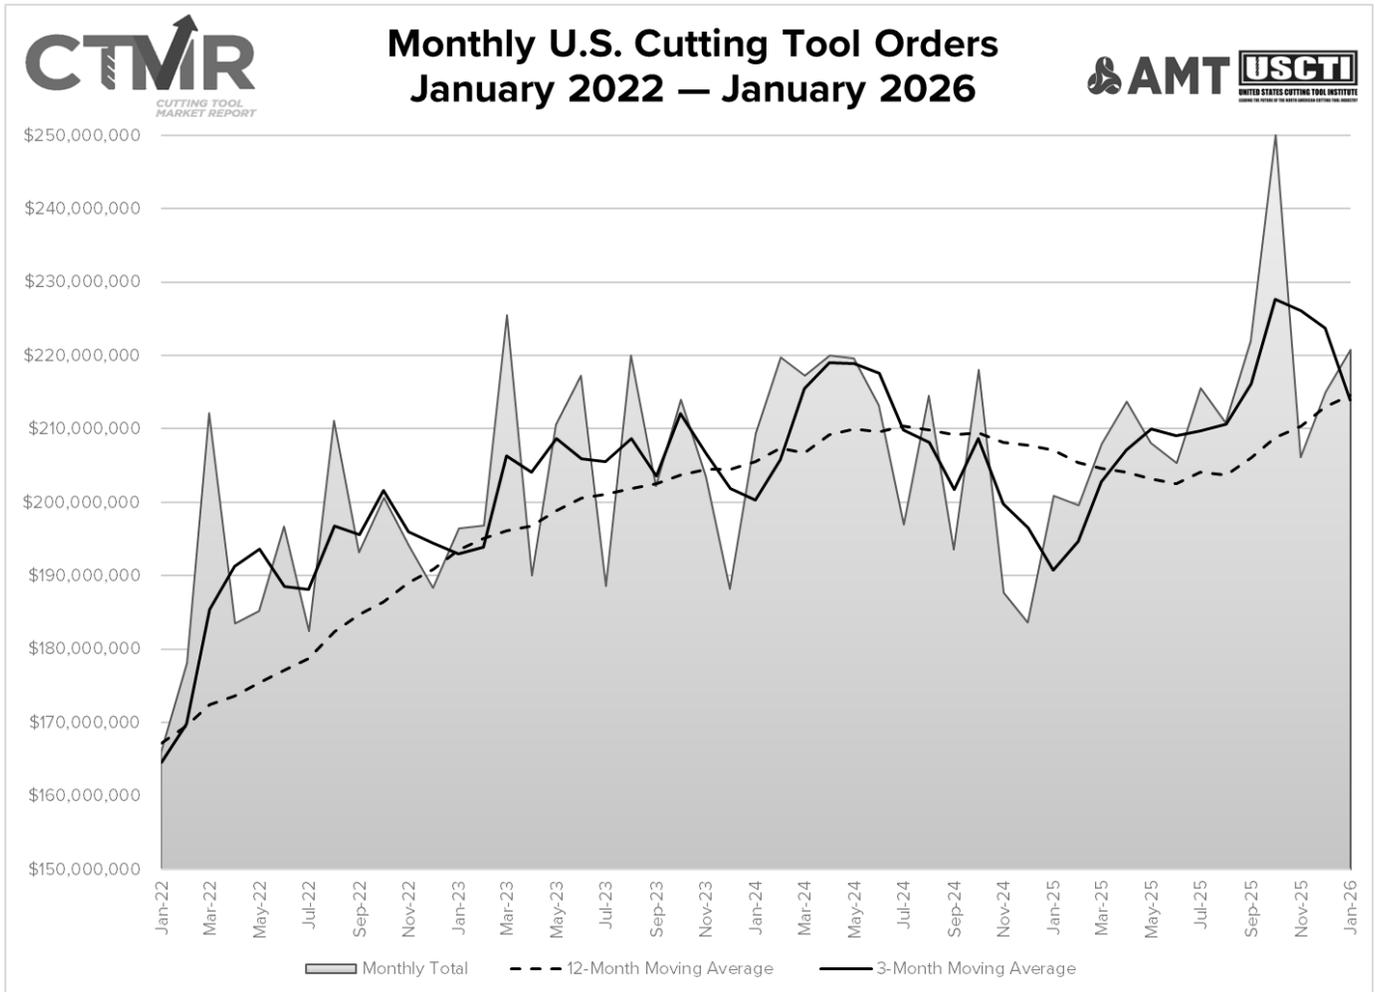

McLean, Va. (March 11, 2026) — Shipments of cutting tools, measured by the Cutting Tool Market Report, a collaboration between AMT – The Association For Manufacturing Technology and the U.S. Cutting Tool Institute (USCTI), totaled \$220.7 million in January 2026. Orders increased 2.7% from December 2025 and were up 9.9% from January 2025. While the dollar value of shipments increased in January, the number of units shipped decreased slightly from December.

“Activity, usage, and new projects all indicate that the latest trend is very positive,” said Jack Burley, chairman of AMT’s Cutting Tool Product Group and president of Big Daishowa, a cutting tool manufacturer. “Overall, this year is off to a good start, with no indications of a slowdown. However, the cost of tungsten carbide raw materials continues to increase, challenging cutting tool manufacturers to stay competitive.”

Bret Tayne, president of Everede Tool Company, a cutting tool manufacturer, said, “The data on cutting tool shipments shows indications of continued volatility. Cutting tool shipments increased 2.7% from December 2025 to January 2026, which was the slowest growth between December and January since 2022. Recent events have raised economic uncertainty, complicating efforts to project levels of overall industrial production.”

The Cutting Tool Market Report is jointly compiled by AMT and USCTI, two trade associations representing the development, production, and distribution of cutting tool technology and products. It provides a monthly statement on U.S. manufacturers’ consumption of the primary consumable in the manufacturing process, the cutting tool. Analysis of cutting tool consumption is a leading indicator of both upturns and downturns in U.S. manufacturing activity, as it is a true measure of actual production levels.

### AMT – The Association For Manufacturing Technology

represents U.S.-based providers of manufacturing technology – the advanced machinery, devices, and digital equipment that U.S. manufacturing relies on to be productive, innovative, and competitive. Located in McLean, Virginia, near the nation’s capital, AMT acts as the industry’s voice to accelerate the pace of innovation, increase global competitiveness, and develop manufacturing’s advanced workforce of tomorrow. With extensive expertise in industry data and market intelligence, as well as a full complement of international business operations, AMT offers its members an unparalleled level of support. AMT also produces IMTS – The International Manufacturing Technology Show, the premier manufacturing technology event in North America. Learn more at [AMTonline.org](http://AMTonline.org).

### The United States Cutting Tool Institute (USCTI) was formed in

1988 and resulted from a merger of the two national associations representing the cutting tool manufacturing industry. USCTI works to represent, promote, and expand the U.S. cutting tool industry and to promote the benefits of buying American-made cutting tools manufactured by its members. The Institute recently expanded its bylaws to include any North American manufacturer and/or re-manufacturer of cutting tools, as well as post-fabrication tool surface treatment providers. Members, which number over 80, belong to seven product divisions: Carbide Tooling, Drill & Reamer, Milling Cutter, PCD & PCBN, Tap & Die, Tool Holder and All Other Tooling. A wide range of activities includes a comprehensive statistics program, human resources surveys and forums, development of product specifications and standards, and semi-annual meetings to share ideas and receive information on key industry trends.
