Frontend Engineer (m/f/d)

(Full time) (Frankfurt || Kassel) (€50-75k+) (Perks included. Loot on top!)

Do you love developing software frontends that resonate with your end users? Do you care about a consistent user experience across all media and devices? Do you enjoy designing functional, frictionless user journeys?

Are you familiar with SCSS, TypeScript, React or Angular? Are you an eager and quick learner? Do you thrive working with capable and committed people in cross-disciplinary agile teams?

Join us and turn challenging projects into success stories by building brilliantly simple software that speaks to human hearts and minds.

Yatta

◎ Key responsibilities & tasks

We develop software on behalf of our customers and conduct research and development for our own software products and services, from the user interface to the backend and operation, both open source and commercial.

- Frontend & web development in small, agile teams—for customers and/or for our own products and services related to the Yatta Platform

- New and further development of modern, complex web applications, websites and eCommerce platforms using TypeScript, JavaScript, SCSS and common frameworks (such as Angular, React, Vue)

- Implementation of user interfaces based on Figma prototypes in close collaboration with UI/UX designers, backend developers and copywriters to ensure usability, accessibility and a consistent brand experience

- Selecting and deploying CMS solutions, and developing and customizing templates

- Continuous improvement of quality through code and design reviews, compliance with security standards, documentation and bug fixes

- Active sharing of knowledge, skills and experience within and across teams to continuously improve software, code and design quality

🎓 Required qualifications

- Degree in computer science with above-average grades (preferably M.Sc., diploma or PhD) or similar qualification

- Several years of practical experience in designing and developing software, especially frontends—preferably as part of a development team (e.g., through work experience, open-source projects or internships)

- Technical know-how and experience using some of our technologies, frameworks and tools for frontend and web development in an enterprise environment

- Experience in building, maintaining and deploying token-based style guides and components

- As the interface between design and technology, user and customer, your goal is to always find and implement the most sustainable solutions

- Strong problem-solving and decision-making skills with good judgment and appreciation for feedback to develop and grow

- Understand fundamentals of backend development to ensure productive collaboration as part of the team

- Strong understanding of users, quality and ergonomics

- Enjoy interdisciplinary work with a user-centric focus to develop user-friendly software that not only works, but also delights

It's not just your qualifications that matter, but who you are and what you want to learn and achieve in the future.

Come for the vision, stay for the team

Top locations, prime equipment

Our offices in the hearts of Frankfurt and Kassel are designed to foster connection, collaboration and community.

Together, we make sure we have the very best tools for our daily work—and when it comes to tech and equipment, we are picky.

Frankfurt   Kassel

Teamwork on and off the field

Creativity and camaraderie are key to innovation. That's why in-person collaboration is at the core of how we work.

Outside the office, our Christmas and summer parties, and team events offer plenty of chances to connect with each other.

Continuous improvement

Self-reflection and continuous improvement are an essential pillar of our work. It's important to keep learning and experimenting; have a spirited debate over coffee, borrow a book from our library and participate in our Academy to deepen your knowledge in tech, communication, design, economics and more.

Berlitz®

...and we've got all the other perks and benefits

Flextime, fruit and fantastic coffee—not to mention our team breakfasts and parties—we have it all because someone like you took the initiative.

And if you need to relocate to join us, we support you through the entire process.

Technologies we excel with

We use...

Frontend technologies	React · Angular · Sass · JavaScript · HTML5 · TypeScript
Backend technologies	Python · Java · Kotlin · C++ · C#
Mobile app technologies	Swift · Objective C · Ionic · Kotlin
Methods and processes	Scrum · Kanban · V-Modell XT · Lean
Collaboration tools	Jira · Confluence · Figma · Git · Slack · Jenkins

to build...

Cloud platforms & services
AWS · OpenShift · Kubernetes

Mobile apps
iOS · Android

Desktop applications
Windows · Mac · Linux

for enterprise applications and consumer software.

Domains

Banks & financial services

Automotive

Medical technology

Housing & energy

Research & education

Logistics

Telecommunications

Software, IT & developer tools

We develop and leverage our knowledge across many industries and sectors, but we always try to build software that serves real life.

Yatta is a tech startup and software company located in Kassel and Frankfurt (Germany). We believe that software is changing the world for the better. That's why we strive to improve software engineering. Our mission is to enable developers by providing them with state-of-the-art tooling, for now and tomorrow.
