

Frontend Developer (m/f/d)

Full time

Frankfurt || Kassel

€50-75k+

Perks included. Loot on top!

Do you love developing software frontends that resonate with your end users? Do you care about a consistent user experience across all media and devices? Do you enjoy designing functional, frictionless user journeys?

Are you familiar with SCSS, TypeScript, React or Angular? Are you an eager and quick learner? Do you thrive working with capable and committed people in cross-disciplinary agile teams?

Join us and turn challenging projects into success stories by building brilliantly simple software that speaks to human hearts and minds.

Your key responsibilities

We develop software on behalf of our customers and conduct research and development for our own software products and services, from the user interface to the backend and operation, both open source and commercial.

- Frontend & web development in small, agile teams – for customers and/or for our own products and services related to the »Yatta Platform«
- New and further development of modern, complex web applications, websites and eCommerce platforms using TypeScript, JavaScript, SCSS and common frameworks (such as Angular, React, Vue)
- Implementation of user interfaces based on Figma prototypes in close collaboration with UI/UX designers, backend developers and copywriters to ensure usability, accessibility and a consistent brand experience
- Selecting and deploying CMS solutions, and developing and customizing templates
- Continuous improvement of quality through code and design reviews, compliance with security standards, documentation and bug fixes
- Active sharing of knowledge, skills and experience within and across teams to continuously improve software, code and design quality

Your qualifications

- Degree in computer science with above-average grades (preferably M.Sc., diploma or PhD) or similar qualification
- Several years of practical experience in designing and developing software, especially frontends – preferably as part of a development team (e.g., through work experience, open-source projects or internships)
- Technical know-how and experience using some of our technologies, frameworks and tools for frontend and web development in an enterprise environment
- Experience in building, maintaining and deploying token-based style guides and components
- As the interface between design and technology, user and customer, your goal is to always find and implement the most sustainable solutions
- Strong problem-solving and decision-making skills with good judgment and appreciation for feedback to develop and grow
- Understand fundamentals of backend development to ensure productive collaboration as part of the team
- Strong understanding of users, quality and ergonomics
- Enjoy interdisciplinary work with a user-centric focus to develop user-friendly software that not only works, but also delights

It's not just your qualifications that matter, but who you are and what you want to learn and achieve in the future.

Come by and get to know us. Drinks are on us! 🍷

Shared beliefs

Technology with heart and mind

- *Analytical thinking:* We love problems. We enjoy thinking through and dissecting them. We analyze and recognize potential while developing and exploring solutions. We take on challenges and achieve results as a team.
- *Progress through continuous development:* We strive to consistently improve and always try to find the local optimum for each situation. We are constantly looking for new opportunities, seek to avoid waste and do not shy away from a challenge.
- *Sustainability through foresight:* We think long term and do not limit ourselves to short-term results. We do not foster egotistic needs but focus on the common good.
- *Lifelong learning:* We are all students. We are all teachers. Natural curiosity and continuous development are part of our DNA. We learn as a team in and outside our Academy, in software development and beyond. We reflect together and continue to grow—as Mensch, team, and organization.

End-user focus

- *Human-centric:* Software development is not an end in itself. We measure our work as developers by the fact that our software ultimately helps and inspires people in real life.
- *Holistic:* We know that software is more than just code. Design, communication, language, accessibility, and usability are just as important as cost-effectiveness, maintainability and utility.
- *Entrepreneurial:* Good development never stops. With lean management and agile processes, we plan, build, and maintain software throughout its lifecycle. We follow this approach to ensure the best possible user experience. For today and tomorrow.

Teamwork and responsibility

- *Teamwork:* A good team is more than the sum of its parts. We believe in the value of intensive, personal collaboration. As directly and immediately as possible, using technology where necessary. Diversity and interdisciplinarity, exchange and synthesis enrich the result.
- *Sportsmanship:* We work as a team, supporting each other to do our best. Some days you're the strongest, some days you're not, but we always have each other's back.
- *Responsibility:* We take responsibility for our users and customers, for our team and our society, for our vision and our values.

Technologies we excel with

We use...

Frontend technologies

React

Angular

Sass

JavaScript

HTML5

TypeScript

Backend technologies

Python

Java

Kotlin

C++

C#

Mobile app technologies

Swift

Objective C

Ionic

Kotlin

Methods and processes

Scrum

Kanban

V-Modell XT

Lean

Collaboration tools

Jira

Confluence

Figma

Git

Slack

Jenkins

to build...

Cloud platforms & services
AWS · OpenShift · Kubernetes

iOS

Mobile apps
iOS · Android

macOS

Desktop applications
Windows · Mac · Linux

for enterprise applications and consumer software.

Domains

Banks & financial services

Automotive

Medical technology

Housing & energy

Research & education

Logistics

Telecommunications

Software, IT & developer tools

We develop and leverage our knowledge across many industries and sectors, but we always try to build software that serves real life.

Yatta is a tech startup and software company located in Kassel and Frankfurt (Germany). We believe that software is changing the world for the better. That's why we strive to improve software engineering. Our mission is to enable developers by providing them with state-of-the-art tooling, for now and tomorrow.
