

Software Developer Working Student (m/f/d)

Part time (e.g., 16.5 hours per week)

Frankfurt || Kassel

€15-20k+ per year

Perks included. Loot on top!

Do you enjoy coding apps and programs outside your studies? And do you want to build software that benefits and delights users in real life? Here at Yatta, you'll develop digital products and create real value, both economically and by pushing the envelope of how tech can help humanity. You'll learn to use the latest technologies in real-world scenarios and will share knowledge with people who are among the best in their chosen field.

You will join a team of 65+ software engineers, creatives, and entrepreneurs with diverse backgrounds, who all work together on-prem in Germany. Together, we can turn challenging projects into success stories by building brilliantly simple digital products and services. 🚀

yatta.de/careers

Your tasks

We develop software projects for customers and do research and development for our own software products and services, both open source and commercial. Here are some of the things you will do as part of our team:

- In-house software development in small, agile teams
- Design and implementation of software components, products, and services, from analysis and development to deployment and rollout
- Evaluation and analysis of new and existing technologies, frameworks, and tooling for productive use in software development
- Continuous improvement of quality through relentless root-cause analysis, detailed code reviews, thorough documentation, testing, learning, and debugging
- Active sharing of experiences and skills within and across development teams to improve software and code quality
- Contributing to and making good decisions to resolve complex problems and provide sustainable solutions for real life

Your skillset and interests

- You're working on your degree in computer science and have had very good results so far
- Your skills match (at least in part) our tech stack and responsibilities as developers. Everything else is a plus, as long as you are not obsessed :-)
- You have strong problem-solving and decision-making skills with good judgment and appreciation for feedback to develop and grow
- Ideally, you have already worked on—and completed—your own projects or contributed to open source
- You're keen to participate in designing and developing software, and you want to be an integral part of a development team
- You want to be the kind of software engineer who works and thinks holistically, so you learn from the best as part of a true team
- You want to develop software that's used in real life and has a genuine impact on our world

It's not just your qualifications that matter, but who you are and what you want to learn and achieve in the future.

Come by and get to know us. Drinks are on us! 🍷

LOG YATTA

Come for the vision, stay for the team

Top locations, prime equipment

Our offices in the hearts of Frankfurt and Kassel are designed to foster connection, collaboration and community.

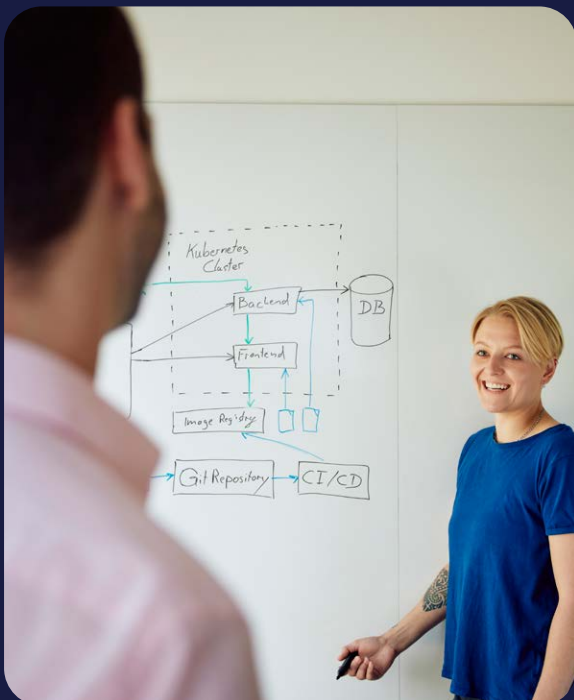

Together, we make sure we have the very best tools for our daily work—and when it comes to tech and equipment, we are picky.

Frankfurt

Kassel

Teamwork on and off the field

Creativity and camaraderie are key to innovation. That's why in-person collaboration is at the core of how we work.

Outside the office, our Christmas and summer parties, and team events offer plenty of chances to connect with each other.

Continuous improvement

Self-reflection and continuous improvement are an essential pillar of our work. It's important to keep learning and experimenting; have a spirited debate over coffee, borrow a book from our library and participate in our Academy to deepen your knowledge in tech, communication, design, economics and more.

...and we've got all the other perks and benefits

Flextime, fruit and fantastic coffee—not to mention our team breakfasts and parties—we have it all because someone like you took the initiative.

And if you need to relocate to join us, we support you through the entire process.

Technologies we excel with

We use...

Frontend technologies

React Angular Sass JavaScript HTML5 TypeScript

Backend technologies

Python Java Kotlin C++ C#

Mobile app technologies

Swift Objective C Ionic Kotlin

Methods and processes

Scrum Kanban V-Modell XT Lean

Collaboration tools

Jira Confluence Figma Git Slack Jenkins

to build...

Cloud platforms & services
AWS · OpenShift · Kubernetes

Mobile apps
iOS · Android

Desktop applications
Windows · Mac · Linux

for enterprise applications and consumer software.

Domains

Banks & financial services

Automotive

Medical technology

Housing & energy

Research & education

Logistics

Telecommunications

Software, IT & developer tools

We develop and leverage our knowledge across many industries and sectors, but we always try to build software that serves real life.

Yatta is a tech startup and software company located in Kassel and Frankfurt (Germany). We believe that software is changing the world for the better. That's why we strive to improve software engineering. Our mission is to enable developers by providing them with state-of-the-art tooling, for now and tomorrow.
