Applanix POSPac Cloud

What is Applanix POSPac Cloud?

Applanix® POSPac™ Cloud is a cloud-based version of Applanix POSPac Desktop available to OEMs, fleet customers, and those embracing a cloud-first strategy. Built with a robust API and secure, redundant architecture, POSPac Cloud reliably and automatically process Trimble® Applanix Hardware (GNSS-INS) data and third-party kinematic Rinex Rover data via the internet . The business model is flexible and supports subscription-based models as well as the pay-per-use concept. Applanix POSPac Cloud supports unlimited business lines, processing data from crewed and uncrewed airborne platforms, land mobile mapping, marine vessels, and autonomous systems.

Is Applanix POSPac Cloud the right solution for you?

Customized solution to better serve your customers

Applanix POSPac Cloud can be easily integrated into your existing software, creating unique applications to enhance customer workflows. Automated software updates ensure the users get the latest software improvements without having to manage software updates themselves and allow users to actively participate in Applanix POSPac development through feature requests. Custom hardware handshaking increases customer retention as customer data can only be processed through your cloud solution. Our on-demand resources allow you to scale instantly, effortlessly adapting to peak workloads and evolving business needs without any upfront infrastructure investment.

A flexible business model that works for everyone

Eliminate crippling upfront costs and perpetual maintenance fees. Our flexible business model transforms your expenses into predictable, operational costs, freeing your budget and enhancing profitability.

Increase profitability through higher operation efficiency

Reclaim Your Time and Focus with Applanix POSPac Cloud: Designed to streamline your workflow, Applanix POSPac Cloud cuts through the manual overhead of desktop software – no more tedious license management, maintenance tracking, or costly user training. Applanix POSPac Cloud ensures you're always ahead, with automatic software updates delivering the latest features directly to you. Our automated data processing boosts usability, drastically reducing your need for education and troubleshooting. And with automatic renewals, enjoy uninterrupted service and eliminate the administrative hassle of managing licenses and maintenance agreements, letting you concentrate purely on your mission.

Redundant and secure cloud architecture for peace of mind

Cybersecurity is on our mind. With 24/7/365 monitoring, cybercrime protection, and vulnerability checks, Applanix POSPac Cloud is designed with enhanced security so that our users can work confidently. In addition, Applanix POSPac Cloud users have exclusive access to a status page to verify service health.
