### Check Your Wi-Fi Speed at Location

Internet Speed Test

SPEEDTEST

2.5

The Outdoor Camera requires a minimum of 2.5 Mbps upload speed to operate. In a browser on your smartphone visit **telus.com/speedtest** to determine the Internet speed at your chosen location.

No Wi-Fi?
If you are unable to find a location with adequate Wi-Fi coverage, please contact TELUS for assistance.
6 Find an Outlet Near Chosen Location
Indoor OR Outdoor

IMPORTANT
If using an outdoor outlet, you must have an enclosure. Additionally, do not use an outdoor outlet that is timer or switch controlled.

Plug in Camera

## 7 Plan a Cable Route to Outlet

13mm (1/2 inch) Drill Bit

Through corner opening of door, garage or window

Run along siding

Through drilled hole in walll

TIP
Use caulk to seal around the drilled hole.

Cable not long enough? Consider purchasing a DC Extension Cable.

8 Determine Camera Position and Angle

2.5 - 4.5 m (8 - 15 ft)

TIP
Return to the TELUS SmartHome app and view the live feed to help adjust camera to the desired position.

X Add Video Device

Configure Device

LED Reference Guide

| Off		Power off
Solid		Connected to TELUS SmartHome
Flashing		Local network connection
Flashing		Factory reset
Solid		No local or Internet connection
Flashing		Power on, camera booting
Flashing		WPS mode
Flashing		Wi-Fi acess point mode

Troubleshooting (Factory Reset)

NOTE
If you have issues connecting the camera to a TELUS account, power cycle the camera (unplug the power cable from the camera and plug it back in to restore power). If issues persist, reset the camera to factory defaults.
