

Get the TELUS Connect (My Wi-Fi) app

Follow step-by-step instructions within the app or follow this paper guide.

Download the TELUS Connect app, then log in with your My TELUS credentials.

Overview

This guide has three sections. Begin with section **A** and complete each section fully before moving to the next:

- A** Smart Hub assembly
- B** Mounting Smart Hub with arm
- C** TELUS Wi-Fi Hub installation

NOTE
If you need help at any point of the installation, refer to the Additional Support near the end of this guide.

A

Smart Hub assembly

20 minutes
assembly time

Before you start | assemble Smart Hub

See how its done:

To watch an overview installation video, visit telus.com/SmartHubSetup or scan the QR code.

What's in the Smart Hub box?

You'll need:

1 Insert nano SIM card

You'll need:

IMPORTANT
Device must be powered off before installing or removing the nano SIM card. SIM card must be activated on a compatible rate plan.

2 Connect Ethernet cable

You'll need:

3 Attach backplate to Smart Hub

You'll need:

4 Attach clamp to bracket

You'll need:

5 Attach bracket to backplate

You'll need:

Before you start | determine mounting location

See how its done:

To watch an overview installation video, visit telus.com/SmartHubSetup or scan the QR code.

What's been completed?

You'll need:

Recommended equipment

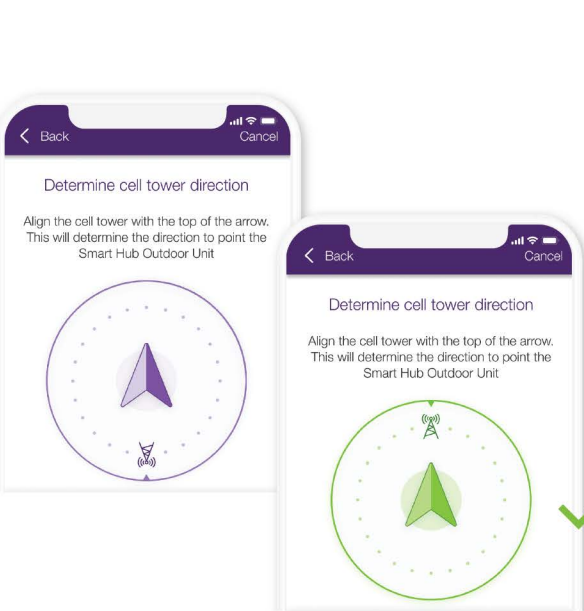

Recommended safety equipment:

Optional tools:

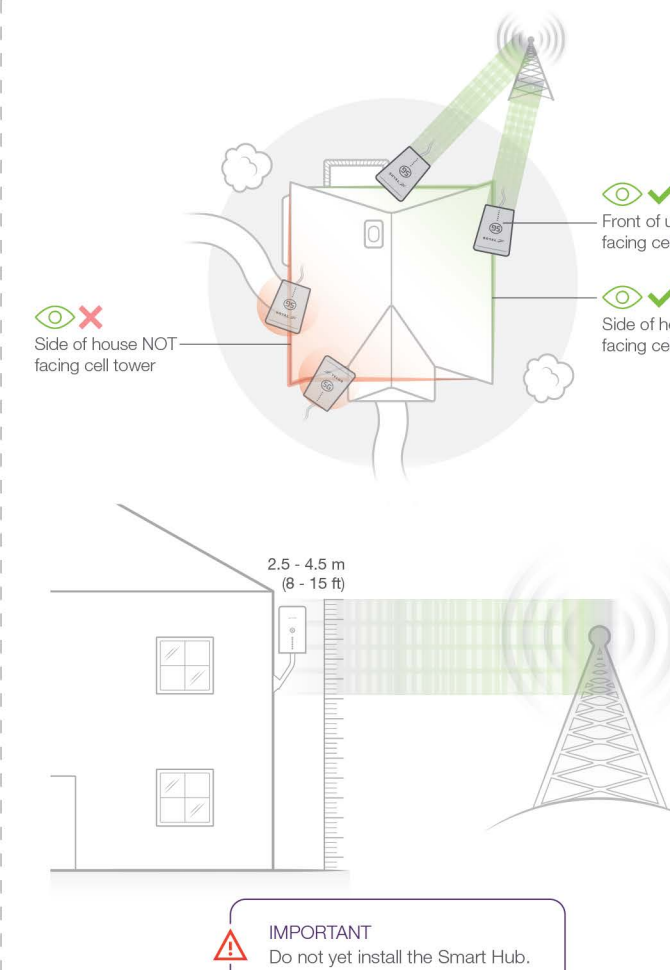

6 Determine cell tower direction

Use the compass feature on the TELUS Connect app, to find the direction of your nearest cell tower.

Can't find the direction?
If you are unable to determine direction of install, please contact TELUS by visiting telus.com/SelfInstall.

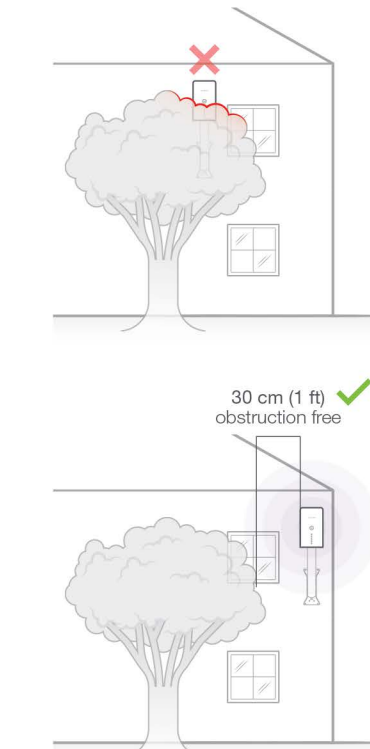

7 Determine a mounting location

IMPORTANT
Do not yet install the Smart Hub.

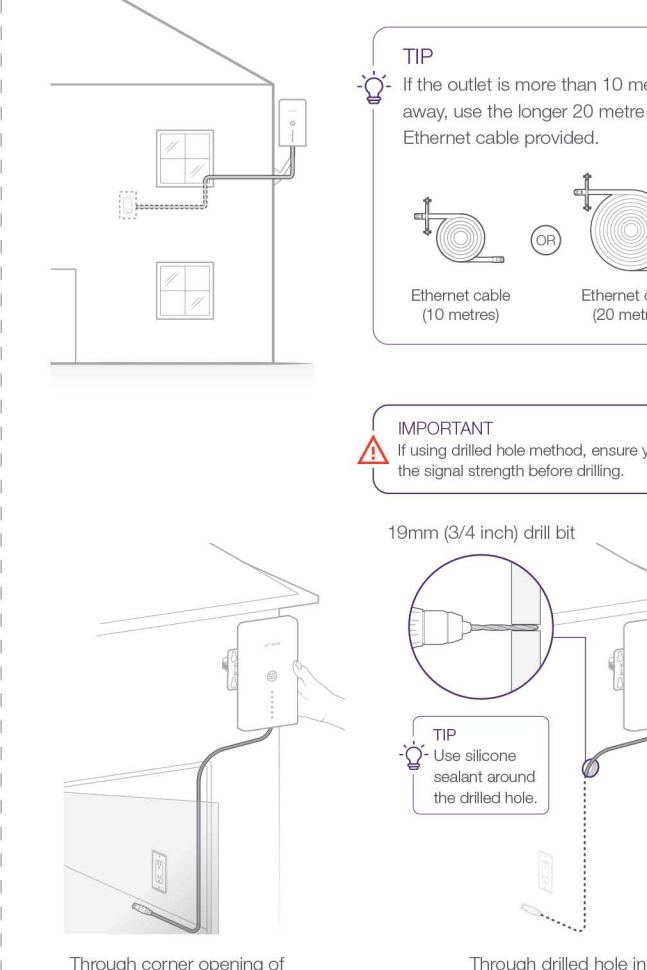

8 Avoid obstructions

If you have obstructions in this location, try a new location facing the same direction

IMPORTANT
Install the mounting point as high as possible. However, to avoid lightning risks, do not put the mounting pole as the highest point on the house (not on the roof).

9 Plan cable route

TIP
If the outlet is more than 10 metres away, use the longer 20 metre Ethernet cable provided.

IMPORTANT
If using drilled hole method, ensure you test the signal strength before drilling.

10 Connect to power

You'll need:

NOTE
Place the sticker included in the box onto the power supply.

11 Allow Smart Hub to boot up

NOTE
The LEDs on the Smart Hub only illuminate for up to 15 mins after boot up before automatically turning off.

12 Test Smart Hub

You'll need:

Weak signal: 1 or 0 solid LEDs
Strong signal: 2 or 3 solid LEDs

IMPORTANT
Determine the best placement for your Smart Hub by ensuring at least 2 or 3 LEDs of signal strength.

B

Mounting arm installation

30 minutes
installation time

Before you start | install mounting arm

See how its done:

To watch an overview installation video, visit telus.com/SmartHubSetup or scan the QR code.

What's been completed?

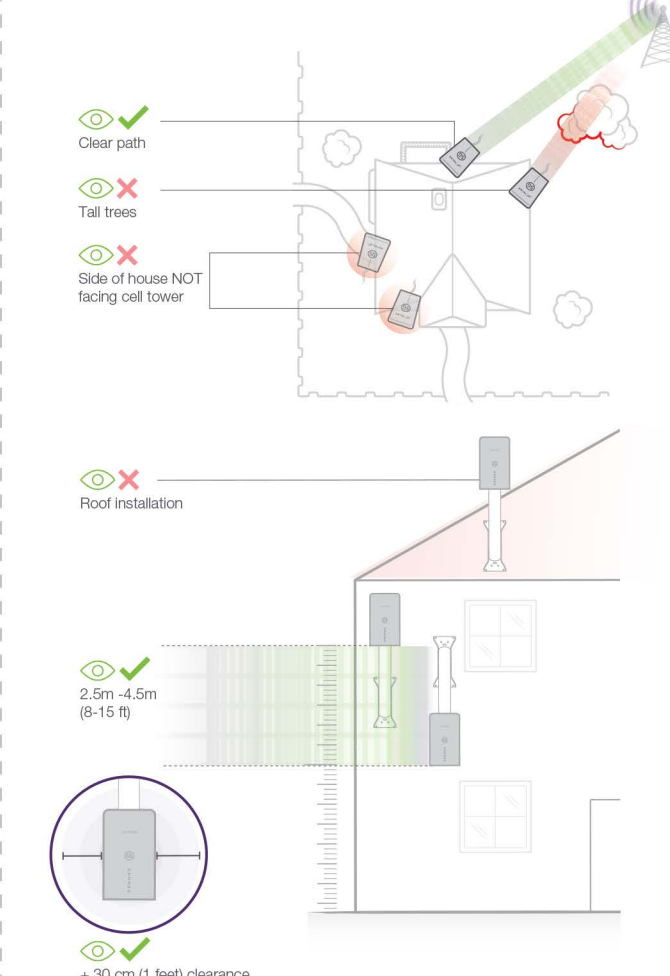

What's in the box?

You'll need:

13 Mounting arm checklist

14 Mark screw holes

Turn over to continue mounting arm installation

15 Determine your siding

Wood Vinyl Aluminum

Stucco Brick Stone

Go to step 17

Go to step 16

16 Masonry installation

You'll need:

- Wall anchors
- 8mm (5/16 inch) drill bit
- Drill
- Hammer (optional)

x4

x4

17 Attach mounting arm

TIP: If needed, adjust the angle of the mounting arm to improve Smart Hub signal strength.

18 Attach Smart Hub to mounting arm

You'll need:

- Smart Hub assembly
- Screwdriver (Flat)

19 Check Smart Hub signal strength

Strong signal: 2 or 3 solid LEDs

Weak signal?
Fine tune the position of your Smart Hub by moving the mounting arm up/down and or rotate the Smart Hub along the mounting arm. If the issue persists, visit telus.com/SelfInstall for additional support.

TELUS Wi-Fi Hub installation

15 minutes installation time

Before you start

What has been completed?
Smart Hub assembly with strong signal

What's in the box?
TELUS Wi-Fi Hub, Ethernet cable, Power supply

You'll need:
Smartphone or tablet

20 TELUS Wi-Fi Hub placement

TIP: Within reach of the Ethernet Cable, try to position the TELUS Wi-Fi Hub as close as possible to the central Wi-Fi usage area of your home. Use an extension cable if necessary.

Central location

TIP: Avoid placing the TELUS Wi-Fi Hub closer than 2 metres to devices such as microwaves, cordless phones or Bluetooth wireless devices.

2+ metres

Ensure 2+ inches of space all around to prevent overheating

Behind thick walls or heavy objects

Clear, open space off floor

21 Connect TELUS Wi-Fi Hub

Indoors: LAN/WAN Port, TWH Power Supply, RJ45-1 LAN-IN Port

Outdoors

22 Booting up TELUS Wi-Fi Hub

Flashing (30 seconds)

Solid

LAN

NOTE: Refer to the lid on your TELUS Wi-Fi Hub for more information on LED states and Troubleshooting.

23 Connect to your new TELUS Wi-Fi

Wi-Fi Network: TELUSXXXX
Wi-Fi Password: XXXXXXXXXX

Connect to your new TELUS Wi-Fi

NOTE: Once you are connected to the TELUS Wi-Fi Hub, test your Internet connection by searching for a website from your Internet browser.

24 Test your Wi-Fi speed

Download speeds of more than 5 Mbps and upload speeds of more than 1 Mbps indicate a good Internet connectivity has been established.

Weak signal?
If you are not satisfied with your Wi-Fi speed visit telus.com/SmartHubSupport for additional troubleshooting instructions.

Test your Wi-Fi speed

5 Mbps, 1 Mbps

Run speed test

25 Configure your network

TIP: With the TELUS Connect app, if you set your new Wi-Fi Network Name and Password to the same as your previous Wi-Fi, all your devices automatically reconnect.

Select 'Set up Wi-Fi Hub'. Follow the on-screen instructions to configure your network and access admin controls.

Don't forget to connect all your devices to your new Wi-Fi network.

26 Optional: secure cable route

Staples, Cable tracks, Cable fasteners

NOTE: Staples, cable tracks or cable fasteners are NOT supplied in kit.

Nice work, you're all done!

Smart Hub LED reference guide

SIGNAL

- Off: There is no signal or nano SIM card inserted
- Solid: The signal strength is shown by 3 LEDs. The stronger the signal the more LEDs are illuminated

NETWORK

- Flashing: The device is in error status:
 - The device is not registered to the mobile network
 - There is no nano SIM card inserted
 - There is no network service available
- Flashing: The device is registered or connected to the 3G/4G mobile network
- Solid: The device is registered or connected to the 5G mobile network

LAN

- Off: The LAN port is not connected
- Flashing: Data is being transferred
- Solid: The LAN port is connected

POWER

- Off: Power is off
- Solid: Power is on and external power supply is working normally

Smart Hub troubleshooting

Indoors: TELUS Wi-Fi Hub, Smart Hub, Power Supply

Outdoors: Smart Hub

Can't access the Internet?

- Make sure the Ethernet cables are connected as outlined in previous steps.
- Having issues connecting the device to the TELUS network, power cycle the Smart Hub (unplug the power supply and plug it back in to restore power).
- Having issues with your Wi-Fi connectivity, power cycle the TELUS Wi-Fi Hub (unplug the power cable and plug it back in to restore power).
- Not able to connect to your Wi-Fi network, check the LED status on the TELUS Wi-Fi Hub and use the My Wi-Fi App to check the Wi-Fi settings.
- Still have Internet access problems, visit telus.com/SelfInstall.

TELUS Wi-Fi Hub LED reference guide

Internet Light

- Off: Your Wi-Fi Hub is off or light is turned off
- Solid: Your Wi-Fi Hub cannot connect to Internet
- Flashing: Your Wi-Fi Hub is resetting
- Flashing: Your Wi-Fi Hub is updating
- Solid: Your Wi-Fi Hub is online
- Flashing: Your Wi-Fi Hub is starting up

TELUS Wi-Fi Hub LED reference guide

Wi-Fi Light

- Off: Your Wi-Fi Hub is off or light is turned off
- Solid: Your Wi-Fi Hub's Wi-Fi is off or there is a hardware issue
- Solid: One of your Wi-Fi Hub's Wi-Fi bands are off
- Solid: Your Wi-Fi Hub is pairing
- Solid: Your Wi-Fi Hub's Wi-Fi is paused
- Solid: Your Wi-Fi Hub is online
- Flashing: Your Wi-Fi Hub is pairing

TELUS Wi-Fi Hub troubleshooting

- Having issues connecting to the Internet or no lights are on, unplug the power cable from the back of the Wi-Fi Hub, wait 30 seconds and plug it back in.
- If issues persist or you have trouble with successfully entering the admin password, reset the Wi-Fi Hub to factory defaults and try again.

Factory Reset 10 seconds
