# Equipment your technician may install

## Advanced Wi-Fi modem

- Connects all the devices in your home, both wired and wireless. Specific models may vary.
- Provides personalized secure home Wi-Fi to wirelessly connect to the Internet.

## Optical Network Terminal (ONT)

- Connects to your modem and translates light signals from a fibre optic line into electronic signals that your modem can read.

## Optik TV PVR

- Lets you watch and record multiple shows in astonishing quality from any room in your home.

# Solutions your technician can provide

## TELUS Boost Wi-Fi

- Extend the range of your home Wi-Fi and get the best coverage in every corner of your home.

## Additional digital boxes

- Extend the viewing experience to other TVs in your home.

## Additional remote controls, jacks and cables

- Additional remote controls, jacks and cables may be purchased as desired.

## Extra channels and services

- Add extra channels or services while the technician is onsite.

# Our customer service is what sets us apart

Following today's installation, you may receive a survey call from TELUS to rate your service and to provide feedback on your technician.

**Here is a sample of what you will see on the survey:**

- How would you rate the overall performance of the technician who did your install or repair?
- Did you receive a call from the technician prior to their arrival at your home?
- Did the technician introduce themselves and provide you with a business card when they arrived?
- Did the technician tell you when they completed the job?
- Did the technician provide information on TELUS products and services, including additional channels, how to use your services, etc.?
- If you have any Wi-Fi devices, did the technician explain how Wi-Fi works and show you the Wi-Fi performance around your home?
- Would you recommend TELUS to a friend or colleague?

**If you have any questions or experience any issues over the next 30 days, please call your technician.**

# Welcome to TELUS

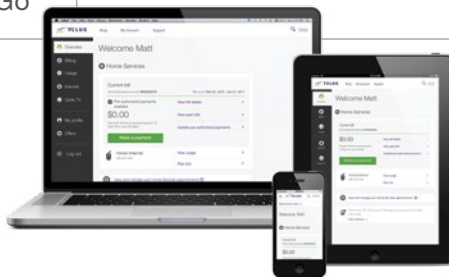

We're excited to have you on board. Now that you have your services installed, you can easily manage your TELUS services online when it's convenient for you.

- Visit **telus.com/mytelus** to login or register, or through our new mobile app. To get the app visit **telus.com/app**
- You will need your account number for registration.

You can find your account number on your first bill when it is sent or visit **telus.com/contact** to call or chat online with us.

Thank you for choosing TELUS.

# Canada's most comprehensive all-in-one protection\*

Get superior protection for your device, online privacy and identity with TELUS Online Security, Powered by NortonLifeLock™.

Go to [telus.com/onlinesecurity](https://telus.com/onlinesecurity) to learn more.

## Protect your devices

When browsing the web, your devices are safeguarded by real-time protection against viruses, spyware, and other online threats.

## Mask your information and data

Public Wi-Fi networks and software vulnerabilities can be exploited by criminals to steal your data and financial information. A VPN (Virtual Private Network) can help keep you anonymous while you browse, by encrypting the data you send and receive online.

## Stay updated on identity theft

Cyber attackers are often able to get a hold of user data. While no one can stop these breaches, NortonLifeLock™ monitors the dark web for your data, and if your identity is stolen, will help restore your identity.

Learn more at [telus.com/onlinesecurity](https://telus.com/onlinesecurity)

\*Applies to TELUS Online Security Standard, Complete, and Ultimate plans.

## Create your own personalized TELUS email address\*\*

All TELUS Internet customers receive up to 10 free TELUS personalized email addresses.

Activate your inbox by visiting [telus.com/emailsetup](https://telus.com/emailsetup)

\*\* If you are a TELUS PureFibre™ customer this may not apply to you as this feature may not be available in all services and packages.

# Optik on the Go

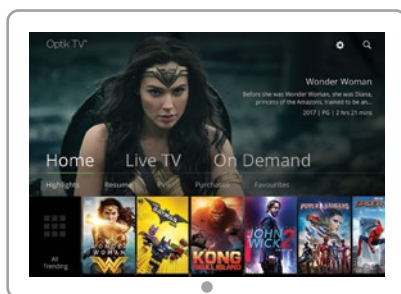

Use the Optik TV® app to watch live and On Demand shows and movies.

Using your smartphone or tablet, you can:

- Access the most live TV channels available on the go in western Canada.
- Set recordings while you are out.
- Choose from thousands of On Demand titles.
- Order a movie on your TV and pick up where you left off on your tablet.

## Step 1: Sign up for My TELUS

Visit [telus.com/register](https://telus.com/register) to sign up.

## Step 2: Download the Optik TV app

Search for Optik TV in the app store on your Apple or Android device. Launch the app and use your **My TELUS** username and password to login.

For additional details and support, visit [telus.com/optikapp](https://telus.com/optikapp)

## How the number of connected devices/activities impact Wi-Fi

- Based on the internet plan, each connection is allocated a certain amount of capacity (called bandwidth) to transmit data
- Devices take turns transmitting data and the activity will determine how much data is transferred (i.e. browsing social media requires less data than streaming video)
- Higher speed plans allow devices to transmit data faster enabling each device to get to their turn quicker

## Wi-Fi performance

Even though you may subscribe to a high speed TELUS Internet plan, your Wi-Fi device may only achieve a portion of the maximum speed of your plan.

Newer or higher-end devices are more likely to outperform older or lower-end devices. Since not all devices are created equal, you might notice that some of your devices perform faster when connected to your Wi-Fi network.

# Wi-Fi speeds

## Get the fastest possible connection

Connect your personal devices by Ethernet cable to your TELUS Wi-Fi modem. For Wi-Fi devices, it's always best to get close to your modem.

## Manage shared bandwidth

Internet works similar to water pipes in your home. Water is shared from the same pipe when running the dishwasher, taking a shower and doing laundry. Similarly, when browsing, streaming video, playing games and uploading files all at once, your Internet speed may slow down if there is not enough bandwidth. If you experience this, consider upgrading to a faster speed plan.

The speeds you can achieve within various coverage areas varies with distance from the modem along with other factors.

Your modem will be able to provide coverage throughout your home. On average, maximum speeds and best coverage are achievable within 2000 sq ft\* around your modem. As you move into more distant coverage zones, your speeds will slow down.

# Wi-Fi coverage

## Coverage

Wi-Fi signals have a difficult time getting past different construction materials and barriers inside your home, such as concrete, in-wall piping, heated flooring, appliances, and mirrors. Avoid relocating your modem as your technician has placed the modem in a location to provide the best coverage possible. If you need additional coverage, visit [telus.com/boostwifi](https://telus.com/boostwifi)

## Congestion

More and more people are using Wi-Fi to connect to the Internet at home. This means that your neighbours' Wi-Fi signals may interfere with your connection. Your modem will automatically adjust to optimize your connection. To further minimize this impact, you can get a better Wi-Fi signal when you are closer to your modem.

# Manage your Internet data usage

Everything you do on the Internet consumes data. To avoid overage charges, be aware of the following approximate high consumption activities:

Watching Netflix in 4K / 4K HDR	7 GB / hour
Watching Netflix in HD / SD	3 GB / hour, 1 GB / hour
Downloading movies	700 MB / movie
Video conferencing	200 MB / hour
Streaming audio	Up to 100 MB / hour
Online gaming	Up to 75 MB / hour

Watching Optik TV on your TV does not count as data. However, applications that run on Optik TV such as Netflix will contribute to your data usage.

## Data overage rates

If you exceed your monthly usage allowance, we will automatically provide you with additional data buckets of 50GB as needed.

- \$5 for the first 50 GB
- \$10 for subsequent blocks of 50 GB, to a maximum of \$45 per month
- For \$15 a month, you can get unlimited data usage

## Track, manage, and upgrade your data

1. Log in to **My TELUS** at [telus.com/mytelus](https://telus.com/mytelus)
2. On the Overview page, find your Internet service under **Home Services**
3. Select **View usage** (Your data usage is refreshed in near real time.)

# Get to know your Optik TV remote

## Turn on your TV and digital box

Press **optik** to turn your digital box on/off.

Press **tv** to turn your TV on/off.

## Pausing and playing live TV

Press **pause/play** to pause live TV for up to 90 minutes.

Press **pause/play** again to resume live TV.

## Search for shows and movies

Press **search** to search the channel listings by TV show, movie title, actor or channel name.

Press **back/exit** to go back one screen. Press and hold **back/exit** for 2 seconds to exit to live TV.

## Browse the Channel Guide

Press **guide** to find out which shows are on now and which shows are coming up later.

## Watch your recordings

Press **pvr** to watch your recorded programs, view future programs which are scheduled to record, to change recording settings and to check how much PVR storage space is available.

# How to connect to Wi-Fi

Find your Wi-Fi network name and password within the **TELUS My Wi-Fi** app. You can also edit the name, password or both right from the app.

	Apple iOS	Android	Windows 8 / 10	Mac OS X
<b>Step 1</b> Go to <b>Settings</b>		icons may vary		N/A
<b>Step 2</b> Select <b>Wi-Fi</b>				
<b>Step 3</b> Turn on <b>Wi-Fi</b>				Wi-Fi: <b>ON</b>

- Step 4** Select your Wi-Fi network name once it appears. Your Wi-Fi network name and password can be found on your magnet or on the side of your modem.
- Step 5** Type your password and then select **Connect** or **Join**. Your device will be connected to Wi-Fi.

# Fix a black screen on my TV

## Try the following steps to successfully display Optik TV:

- Make sure that your digital box is plugged in and switched on. Check that the power light on the front of the box is green.
- If the digital box's power light is not green, press **OK** on your remote to reactivate the device. Your digital box may have entered standby mode due to inactivity in order to save you money on your energy bill.

## Still seeing No Signal / Input, a blue screen, or static?

Try the following steps, and wait 10–15 seconds between each step to confirm if the issue has been resolved.

Try changing the channel. If other channels are appearing properly, it may be a temporary problem with that channel.

Ensure that the TV is set to the appropriate input (usually **HDMI 1** or **Component**) based on the cable connecting your digital box to your TV.

Confirm that both ends of the cable connecting your digital box to your TV are firmly plugged in.

If that doesn't work, try moving the cable to another port (e.g., **HDMI 2** from **HDMI 1**) and change the input on the TV to the corresponding input.

Do you have a wireless digital box?

If there is a signal strength indicator on the front of your digital box, it is running wirelessly.

For optimal performance, ensure there are at least 3 signal bars. If you choose to move your wireless digital box, try to pick a location where the signal strength indicator has the most bars by minimizing the distance and any barriers between your digital box and modem.

# Program your remote

Refer to this card if you need to program your remote for a new TV.

1. Ensure there are no objects between the remote and the digital box and that both the digital box and TV are on.
2. Find your TV brand code in the table below.

TV Brand Codes

LG	0015	Samsung	0018	Sony	0017
Panasonic	0013	Sanyo	0012	Toshiba	0016
Philips	0019	Sharp	0014	Vizio	0010

3. Press and hold the **options** button for 3 seconds.

**Note:** The green LED light next to **optik** will flash twice. The TV brand code needs to be entered within 3 seconds after holding down **options**.

4. Use the number pad to enter the 4-digit code of your TV brand.

**Note:** The red LED light next to **tv** will flash twice when a TV brand code is entered.

5. Press **tv**. If your TV turns off, you have entered the correct code. If your TV does not respond, try again from Step 2.

6. Press **OK**.

**Note:** The red TV LED will flash twice to confirm the code is now saved.

7. Press **tv** to switch your TV back on.

## Don't see your TV brand?

For the full list of TV codes, visit [telus.com/optikremote](http://telus.com/optikremote)

# Setup parental controls

You can control what your family watches by setting parental controls to block specific content.

Parental control settings are specific to each digital box, allowing you to block different types of content on each TV in your home. Follow these steps to set up parental controls:

1. Press **menu** on your remote.
  2. On the TV, select **Settings** from the menu and then select **Parental Controls**.
  3. If this is your first time setting up parental controls, you will be asked to create a 4-digit parental control PIN. If you have already created a PIN, you will be asked to enter it.
  4. Use the arrows to highlight **Change** next to the blocking option (channels, movie ratings, TV ratings, adult), you want to select and press **OK**.
- Note:** To block adult movies or TV programs, you must enable **Adult locking**.
5. Use the arrows to make your selection and press **OK**.
  6. Navigate to **Save** and press **OK**.  
The guide should now only show the program content that you did not lock.

# Record TV

Your Optik Personal Video Recorder (PVR) allows you to record your favourite programs, pause and replay TV, and to start watching a recording in one room, pause it, and resume in another.

## Record single episodes and TV series

1. While watching live TV, from the Channel Guide or search results, highlight the program to record.
2. Press **rec** once to record a single episode; twice to record the series; **three times** to cancel a recording.

## Extend your recording time

Sports events and live special programs may go over the allotted program time or cause shows to start later. Use these instructions to adjust the recording time:

3. Press **pvr** on your remote.
4. On your TV, navigate to **Scheduled** to view your scheduled recordings.
5. Select the program you want to extend and press **OK**.
6. Navigate to **Record Settings** and press **OK**.
7. Choose whether to apply settings to a single episode or to the entire series.
8. Select the **Stop Recording** field.
9. Select between **5 minutes** to **3 hours** past the scheduled end time.
10. Select **Save changes** to save your new settings.

# Purchase PIN

You can prevent unauthorized rentals of On Demand or Pay Per View programs by creating a Purchase PIN. This PIN is independent of your Parental Control PIN. Purchase PINs are specific to each Digital Box.

1. Press **menu** on your remote.
2. On the TV, select **Settings** from the menu and then select **Parental Controls**.
3. Select **Purchase PIN** and press **OK**.
4. Create a 4-digit PIN using the number pad on your remote control.
5. Confirm the 4-digit PIN by re-entering the PIN.
6. Press **OK** to select **Rental locking**.
7. Navigate to **Save** and press **OK**. It should now ask you for your PIN prior to making a purchase.

## Turn On Closed Captioning

1. Press **options** on your remote.
2. On the TV, select **Closed Captioning** and press **OK** on your remote.
3. On the TV, select **On** and press OK.

## Turn on Descriptive Video

1. Press **menu** on your remote.
2. On the TV, select **Settings** (scroll down four spaces) and press **OK** on your remote.
3. Select **Audio** (scroll down 2 spaces) and press **OK**.
4. Press **OK** to select **Audio Language**.
5. Press **OK** to select **Descriptive Video**.
6. Select **Save** (scroll up 1 space) and press **OK** on your remote.
7. Press **back / exit** on your remote to return to TV.

Follow these steps if you want to temporarily turn descriptive video off.

1. Press **options** on your remote.
2. On your TV, select **Audio Languages** (scroll down 2 spaces) and press **OK**.
3. Select **English** and press **OK**.
