

SHIFTING THE LIMITS

Wels, January 12th 2016

CERTIFICATES FOR LIGHT VERSION

Fronius International GmbH

hereby confirms that the Light (=Lite) version of the

- / **Fronius Galvo**
- / **Fronius Primo**
- / **Fronius Eco**
- / **Fronius Symo**

series are only different by not including the Datamanager as they are intended to be installed in PV systems having multiple inverters.

This means that the rest of the hardware is identical to the corresponding power class model named without Light. Thus the testing reports and certificates apply to the Light (Lite) version of the same power class as well.
