Edit, Prepare, and Sign Documents with Docusign PDF Editor

PDFs are everywhere. Contracts, invoices, offer letters, forms, and reports move through your organisation every day. But when someone needs to fix a typo or turn a PDF back into a Word file, they're usually stuck choosing between a free viewer that can't do it and an expensive license built for designers.

Docusign PDF Editor, part of the Docusign IAM portfolio, gives every employee the PDF tools they need with industry-leading Docusign eSignature built in. Editing a document and sending it for signature becomes one task instead of two.

Sign with the e-signature solution your recipients already trust

Plenty of PDF editors now include some form of signing, but not all signing is equal. PDF Editor is the only one integrated with Docusign, so when a document's ready, it moves straight into a signing experience your recipients recognise.

- Send any PDF for signature in Docusign, with your file already loaded so you go straight to adding recipients and fields
- Use Sign a Document to apply your signature in Docusign when yours is the only one needed
- Route agreements through the platform IDC has recognised as #1 in e-signature for over a decade

Lower your total cost of ownership

Consolidate your document tools into one platform and get the PDF capabilities your teams use every day, without paying for the ones they don't.

- One vendor, one renewal, covering both PDF editing and eSignature
- No need to pay for creative features business users never open
- Price for your whole workforce rather than a small pocket of power users, so you can cover everyone who work's with PDFs daily

Get the PDF tools business teams actually use

From quick text fixes to page reorganisation and redaction, PDF Editor covers the tasks that come up every day.

*Validation only for Mac version

Security and login controls your IT team already manages

PDF Editor runs on the same Docusign account, login, and admin controls your organisation already relies on, so there's nothing new to vet or stand up.

- Sign in with existing Docusign credentials, including your organisation's single sign-on (SSO), so access follows the policies you already enforce
- Manage PDF Editor licenses alongside your eSignature and IAM seats in one admin console
- Keep PDF work inside software IT has already approved, instead of tools bought outside the vendor process

About Docusign

Docusign brings agreements to life. Nearly 1.8 million customers and more than a billion people in over 180 countries use Docusign solutions to accelerate the way they do business and to simplify people's lives. With intelligent agreement management, Docusign unlocks business-critical data that is trapped inside documents. Until now, this information has been disconnected from core business systems of record, costing organisations time, money and opportunity. Using the Docusign Intelligent Agreement Management platform, companies can create, commit and manage agreements with solutions from the number one company in e-signature and contract lifecycle management (CLM).
