

VERIFICATION OPINION DECLARATION GREENHOUSE GAS EMISSIONS

To: The Stakeholders of DocuSign, Inc.

Apex Companies, LLC (Apex) was engaged to conduct an independent verification of the greenhouse gas (GHG) emissions reported by DocuSign, Inc. (DocuSign) for the period stated below. This verification declaration applies to the related information included within the scope of work described below.

The determination of the GHG emissions is the sole responsibility of DocuSign. DocuSign is responsible for the preparation and fair presentation of the GHG emissions statement in accordance with the criteria. Apex's sole responsibility was to provide independent verification on the accuracy of the GHG emissions reported and on the underlying systems and processes used to collect, analyze and review the information. Apex is responsible for expressing an opinion on the GHG emissions statement based on the verification. Verification activities applied in a limited level of assurance verification are less extensive in nature, timing, and extent than in a reasonable level of assurance verification.

Boundaries of the reporting company GHG emissions covered by the verification:

- Operational Control
- Worldwide

Types of GHGs: CO₂, N₂O, CH₄, HFCs

GHG Emissions Statement:

- **Scope 1:** 358 metric tons of CO₂ equivalent
- **Scope 2 (Location-Based):** 7,916 metric tons of CO₂ equivalent
- **Scope 2 (Market-Based):** 3.4¹ metric tons of CO₂ equivalent
- **Scope 3:**
 - Purchased Goods & Services (Market-Based): 31,852 metric tons of CO₂ equivalent
 - Capital Goods: 3,554 metric tons of CO₂ equivalent
 - Fuel- and Energy-Related Activities (Location-Based): 2,151 metric tons of CO₂ equivalent
 - Fuel- and Energy-Related Activities (Market-Based): 2,218² metric tons of CO₂ equivalent
 - Business Travel: 13,845 metric tons of CO₂ equivalent
 - Employee Commuting (Market-Based): 7,210 metric tons of CO₂ equivalent

¹ Contractual purchase data for renewable energy associated with 1,732 MWh was reviewed; however, the corresponding energy attribute certificates (EACs) were not available for review at the time of verification.

² A clean power well-to-tank (WTT) factor is applied to facilities utilizing clean power (electricity) directly (bundled environmental attribute certificates). A grid WTT factor is applied to facilities utilizing clean power (electricity) indirectly (unbundled environmental attribute certificates).

Data and information supporting the Scope 1 and Scope 2 GHG emissions statement were historical in nature, but in some cases estimated.

Data and information supporting the Scope 3 GHG emissions statement were in some cases estimated rather than historical in nature.

Global Warming Potential (GWP) and emission factor data sets:

- GWP: Intergovernmental Panel on Climate Change (IPCC) Sixth Assessment Report (AR-6)
- United States Environmental Protection Agency (USEPA) Emissions & Generation Resource Integrated Database (eGRID) (2023 data), 2025
- USEPA Emission Factor Hub, 2025
- International Energy Agency (IEA) Emission Factor Database (2023 data), 2025
- United Kingdom (UK) Department for Environment Food & Rural Affairs (DEFRA), UK Government GHG Conversion Factors for Company Reporting 2025, June 10, 2025
- United Kingdom (UK) Department for Environment Food & Rural Affairs (DEFRA), UK Government GHG Conversion Factors for Company Reporting 2020, July 17, 2020
- United Kingdom (UK) Department for Environment Food & Rural Affairs (DEFRA), UK Government GHG Conversion Factors for Company Reporting 2021, June 2, 2021
- Australian National Greenhouse Accounts (NGA) Factors 2024, Department of Climate Change, Energy, the Environment and Water (DCCEEW), 2024
- Australian National Greenhouse Accounts (NGA) Factors 2024, Department of Climate Change, Energy, the Environment and Water (DCCEEW), 2025
- National Inventory Report 2022, Volume I, Australian Government, Department of Climate Change, Energy, the Environment and Water, 2024
- The Environment and Climate Change Canada National Inventory Report 1990–2023: Greenhouse Gas Sources and Sinks in Canada
- Ecoinvent 3.11, November 2024
- Green-E Residual Mix Emissions Rates (2022 Data), 2024
- Association of Issuing Bodies (AIB) European Residual Mixes (2024 Data), May 30, 2025
- Open Comprehensive Environmental Data Archive (CEDA), 2025
- CDP Supplier specific emission factors
- Scope 3 methodologies and emission factors in the Watershed platform

Period covered by GHG emissions verification:

- February 1, 2025 to January 31, 2026

Criteria against which verification was conducted:

- World Resources Institute (WRI)/World Business Council for Sustainable Development (WBCSD) Greenhouse Gas (GHG) Protocol Corporate Accounting and Reporting Standard (Scope 1 and 2)
- WRI/WBCSD Greenhouse Gas Protocol Corporate Value Chain Accounting and Reporting Standard (Scope 3)

Reference Standard:

- ISO 14064-3 Second Edition 2019-04: Greenhouse gases -- Part 3: Specification with guidance for the verification and validation of greenhouse gas statements

Level of Assurance and Qualifications:

- Limited
- This verification used a materiality threshold of $\pm 5\%$ for aggregate errors in sampled data for each of the above indicators.

GHG Emissions Verification Methodology:

Evidence-gathering procedures included but were not limited to:

- Interviews with relevant personnel of Docusign;
- Review of documentary evidence produced by Docusign and their consultant;
- Review of Docusign data and information systems and methodology for collection, aggregation, analysis and review of information used to determine GHG emissions; and
- Audit of sample of data used by Docusign to determine GHG emissions.

Verification Opinion:

Based on the process and procedures conducted, there is no evidence that the GHG emissions statement shown above:

- is not materially correct and is not a fair representation of the GHG emissions data and information; and
- has not been prepared in accordance with the WRI/WBCSD GHG Protocol Corporate Accounting and Reporting Standard (**Scope 1 and 2**), and WRI/WBCSD Greenhouse Gas Protocol Corporate Value Chain Accounting and Reporting Standard (**Scope 3**).

It is our opinion that Docusign has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of these GHG emissions for the stated period and boundaries.

Statement of independence, impartiality and competence

Apex is an independent professional services company that specializes in Health, Safety, Social and Environmental management services including assurance with over 30 years history in providing these services.

No member of the verification team has a business relationship with Docusign, its Directors or Managers beyond that required of this assignment. We conducted this verification independently and to our knowledge there has been no conflict of interest.

Apex has implemented a Code of Ethics across the business to maintain high ethical standards among staff in their day-to-day business activities.

The verification team has extensive experience in conducting assurance over environmental, social, ethical and health and safety information, systems and processes, has over 20 years combined experience in this field and an excellent understanding of Apex's standard methodology for the verification of greenhouse gas emissions data.
