

Accelerate time to value and eliminate friction in source-to-pay processes

The DocuSign CLM Connector for SAP Ariba streamlines the source-to-pay process by seamlessly sharing data across systems. A lack of connection between the two solutions can result in excessive manual data entry, lost time moving between systems, and costly mistakes that have led to procurement teams losing over **\$1 million** in savings on average due to missed contractual incentives every year.

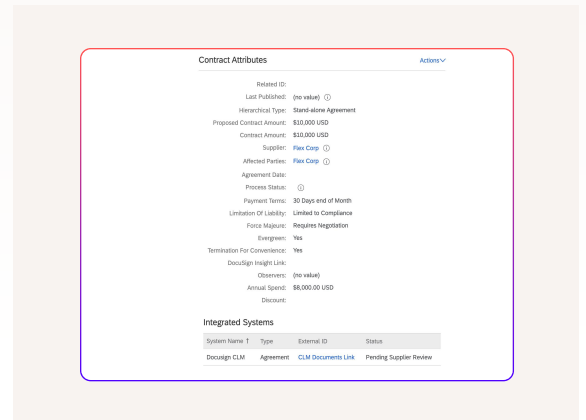

Connect your SAP Ariba Contract Workspace with CLM (Contract Lifecycle Management) to create new supplier agreements directly from Ariba Contract Workspaces, easily ingest third-party documents, seamlessly manage agreement tasks, automatically update Ariba fields, and maintain audit history from both CLM and Ariba. The natively integrated user experience between DocuSign CLM and SAP Ariba allows legal and procurement teams to collaborate more efficiently, streamline data entry, and reduce errors with automated data sharing.

Easy to implement and maintain

Easily and quickly establish a connection with SAP Ariba via the **DocuSign App Center**. Map SAP Ariba Contract Workspace fields to values in CLM via an intuitive user interface and set up a variety of workflow steps to support your sourcing and purchasing needs.

Ready for the next step?

Talk to your DocuSign Sales representative about a demo of the DocuSign CLM Connector for SAP Ariba.

Supported use cases include

- Generate new agreements with key sourcing data from Ariba Contract Workspaces and ingest third-party documents
- Update contract metadata for an existing Contract Workspace in SAP Ariba when contract terms are updated in CLM (e.g., start date, end date, payment terms)
- CLM Workflow-enabled vendor negotiation and internal approvals with live status updates in Ariba
- Add new agreements or amendments to SAP
- Create a new Contract Workspace in SAP Ariba when a new MSA is signed in CLM
- Automatically publish Ariba Contract Workspaces on contract signature
- Automate your contract negotiation and approval process using Ariba supplier and user data
- Pull data from an Ariba Contract Workspace to populate forms and drive contracting workflows in CLM
- Ariba Contract Workspaces

Supported objects

- Contract Workspace
- Ariba Sourcing Project Document
- Ariba Master Data

About DocuSign

DocuSign brings agreements to life. Over 1.5 million customers and more than a billion people in over 180 countries use DocuSign solutions to accelerate the process of doing business and simplify people's lives. With intelligent agreement management, DocuSign unleashes business-critical data that is trapped inside of documents. Until now, these were disconnected from business systems of record, costing businesses time, money, and opportunity. Using DocuSign IAM, companies can create, commit, and manage agreements with solutions created by the #1 company in e-signature and contract lifecycle management (CLM).
