

BENEFITS

- It is highly concentrated, so a smaller amount is enough
- It has a light texture, so it is easily absorbed into the skin
- It does not give a greasy, heavy skin feeling, so men and children like it
- Does not leave white marks
- It is also safe for children to use
- Made from plant extracts

Product Fact Sheet

Oi-Lin® Sunmilk Sunscreen SPF 30, paraben free

SUNSHINE SAFELY

Our Oi-Lin® Sunmilk sunscreen SPF 30 is a creamy sunscreen that you will be happy to use again and again. Our super-light formula spreads easily and evenly and is immediately absorbed into the skin, which provides gentle, yet effective protection against the harmful, burning rays of the sun. It can maintain its effectiveness in water for up to 40 minutes. It has a balanced PH, making it ideal for normal and oily skin types, as well as for those with sensitive skin.

PHILOSOPHY OF REGENERATION®

Sunrider developed its sunscreen based on the Philosophy of Regeneration® to provide protection against the sun's harmful rays. With its plant-based, antioxidant-rich ingredients, it provides a moisturizing, beautifying and regenerating effect. In harmony with the skin's natural pH balance, Sunrider® sunscreens are free of PABA (which can cause allergic reactions) and benzophenones (which can cause contact dermatitis). Sunscreen is practically considered sunscreen as it blocks and reflects harmful UV rays. Made from natural minerals, it differs from chemical-based sunscreens that absorb UV rays.

INGREDIENT HIGHLIGHTS

SQUALANE

Squalene, a highly valued ingredient derived from olive oil, has strong antioxidant properties and has a moisturizing effect. It does not cause irritation and is excellent for any skin type.

ALOE VERA

This juicy plant is considered by many to be a top moisturizer and is also known for its soothing properties.

HYALURONIC ACID

Hyaluronic acid, a substance found naturally in the body, makes your skin fresh and elastic thanks to its water-binding properties. It also promotes skin recovery and regeneration after conditions caused by dryness, environmental stress or irritation.

FAQS

Q: Is Oi-Lin® Sunmilk SPF 30 safe to use on the face?

A: Yes, our Oi-Lin® products are the purest, carefully selected raw materials, with the power of nature and unparalleled expertise of the owner. In addition, men also like to use it because it is easily absorbed.

Q: Does it leave behind white spots or greasy skin?

A: No. Our specially formulated formula is easily absorbed by all skin types, while providing effective protection against sun radiation. Thanks to the precise formulation, it spreads evenly, easily and completely on the skin surface, leaving no sticky or heavy skin feeling behind.

RECOMMENDATION

For safe sunbathing, apply evenly and 20 minutes before sunbathing on the entire body surface. After 40 minutes in water, the protection ceases. Repeat application every 2 hours and after prolonged physical activity or swimming.
