

Oi-Lin® Eye Cream

Brighten and Plump

Oi-Lin® Eye Cream

This fast-acting, ultra-concentrated eye treatment features high-performance ingredients to combat the signs of aging in the delicate eye area. Hyaluronic acid and vitamin B5 combine to moisturize and plump skin for a youthful look. Peptides support collagen production to promote firmer, smoother skin and reduce the appearance of puffiness and dark circles. Like a tall glass of water for your skin, our targeted treatment leaves your under-eye area looking and feeling hydrated and refreshed.

BENEFITS

- Fades the appearance of dark circles
- Smooths the appearance of fine lines
- May protect skin from free radical damage
- Helps support elasticity and firmness
- Made with plant-based ingredients

DIRECTIONS

Apply to the skin around the eye area with your ring finger in a gentle dabbing motion both morning and night.

FAQ

Q: Why is a special treatment needed for the eye area?

A: The delicate skin around the eyes is 6–10 times thinner than the other skin on your face and one of the first places to show signs of aging. Our gentle yet effective treatment addresses the signs of premature aging in this sensitive area with a synergy of potent ingredients.

Q: How do hyaluronic acid and vitamin B5 benefit the under-eye area?

A: Our eye cream is enriched with hyaluronic acid (HA) and vitamin B5, which work together to provide intense hydration and plumpness to the delicate skin under your eyes.

HA hydrates your skin by attracting moisture from the environment and within your skin, replenishing and locking in that moisture. By replenishing your skin's moisture levels, HA can promote a healthy, glowing, dewy appearance.

Vitamin B5 is known for its benefits in promoting skin health, including the under-eye area. With its excellent moisturizing properties, vitamin B5 promotes skin elasticity, leaving your under-eye area looking refreshed, rejuvenated and well-nourished.

FUN FACT

Not all the skin on your body is the same thickness. For example, the soles of your feet and the palms of your hands have the thickest skin, while your eyelids have the thinnest.

INGREDIENT HIGHLIGHTS

HYALURONIC ACID

A powerful humectant, hyaluronic acid (HA) hydrates your skin by attracting and locking in moisture to promote a more supple, deeply hydrated, and plumper appearance of your skin. HA also has antioxidant properties, which may help protect your skin against free radical damage.

PEPTIDES

Short chains of amino acids, peptides are the building blocks of proteins in the skin. They play a crucial role in supporting collagen production, contributing to firmer, smoother, and more youthful-looking skin. Peptides also help diminish the appearance of puffiness and dark circles.

CUCUMBER EXTRACT

Providing natural emollient properties, cucumber is used to soften and hydrate the skin.
