

Product Fact Sheet

Kandesn® Cleansing Cream

CLEANSE, HYDRATE, BALANCE

Kandesn® Cleansing Cream is naturally mild and ideal for removing oil-based impurities, makeup, and daily dirt and debris. Infused with herbal extracts that moisturize while cleansing, Kandesn® Cleansing Cream nourishes and protects but doesn't strip the skin of its natural moisture. Unlike many other skin care products that are improperly balanced for pH, it's formulated with a slightly acidic pH to harmonize with the skin's natural balance. It leaves your face clean and soft with a refreshed appearance.

PHILOSOPHY OF REGENERATION®

Based on the Philosophy of Regeneration®, Sunrider® products are formulated to work in harmony with the skin to promote skin health and natural beauty. Expertly crafted with a wealth of the finest plant extracts from around the world, our skin care contains no mineral oil or animal by-products to ensure pores won't be blocked or suffocated. Cleansing is an important step, so we use a two-step cleansing process, beginning with our cleansing cream.

INGREDIENT HIGHLIGHTS

AVOCADO OIL

One of the most penetrative of all plant oils, avocado oil provides long-lasting moisturizing effects. Its potent humectant properties also promote skin softness and plumping hydration.

ROYAL JELLY EXTRACT

A honey bee excretion, royal jelly nourishes skin with B vitamins and protective antioxidants.

JOJOBA SEED OIL

A natural emollient, jojoba oil's similarity to sebum allows it to absorb easily into skin, making it a gentle, skin-softening moisturizer for all skin types.

FAQS

Q: How is this cleansing cream different from others?

A: Many cleansing creams (also known as cold creams) typically include one or more of the following ingredients: petrolatum, mineral oil, lanolin, and paraffin wax. In healthy contrast, Kandesn® Cleansing Cream contains no petrochemicals, mineral oils, or animal proteins. It's pure, natural formula comprises only the finest natural ingredients, including botanical extracts and vegetable-based oils.

Q: Why is it important to maintain proper pH balance on the skin?

A: Your skin is protected by a shield call the pH acid mantle. This is a healthy combination of sweat from the eccrine sudoriferous glands and oil secreted from the sebaceous glands. Skin is slightly acidic (pH5.5–6.5) to protect it from bacteria and pollution, while helping it seal in moisture.

RECOMMENDATION

Spread an ample amount of product over the entire face. Gently massage entire face with fingertips. Remove the cream with a damp cotton facial cloth.
